CITY OF ZEELAND
PLANNING COMMISSION
NOTICE OF SPECIAL MEETING AND PUBLIC HEARING

Please take notice that the Zeeland City Planning Commission whose chambers are in the Zeeland City Hall at 21 South Elm Street, Zeeland, Michigan, and whose telephone number is (616) 772-0872, will meet at the Howard Miller Community Center – 14 S Church St – Zeeland, MI 49464 at 6:00pm on Monday, May 11, 2026 for a special meeting. The following application will be reviewed at:

6:00pm	
Applicant:	**Allan Barron**
Property Owner:	**Mead Johnson & Company, LLC**
Project Locations:	**640 E Washington Ave, 138 N Fairview St, 126 N Fairview St, 641 E Main Ave, 658 E Main Ave, 649 E Main Ave, 701 E Main Ave, 734 E Washington Ave, 724 E Washington Ave, 725 E Main Ave, 637 E Main Ave, 633 E Main Ave, 109 N Carlton St, 549 E Main Ave, 553 E Main Ave, 107 N Carlton St, 515 E Main Ave, 25 N Division St, 605 E Main Ave, 55 N Division St**
PINS:	**70-17-18-400-011, 70-17-18-400-016, 70-17-18-400-017, 70-17-18-400-020, 70-17-18-400-022, 70-17-18-400-023, 70-17-18-400-027, 70-17-18-400-032, 70-17-18-400-034, 70-17-18-400-040, 70-17-18-400-041, 70-17-18-400-044, 70-17-18-400-045, 70-17-18-470-002, 70-17-18-470-010, 70-17-18-470-011, 70-17-18-470-016, 70-17-18-470-021, 70-17-18-471-005, 70-17-18-471-008, 70-17-18-471-009**
Zoning:	**I-2 – General Industrial District**
Description of Request:	**Site Plan Review and Special Land Use Application for an industrial facility campus modernization project. The project spans multiple parcels generally located along E Main Avenue, E Washington Avenue, and N Carlton Street. Proposed improvements include the construction of multiple industrial buildings of varying heights totaling approximately 619,000 square feet, along with associated parking areas, internal vehicle circulation, stormwater management systems, landscaping and screening, and signage.**

The public, anyone receiving this notice, or any interested person may be heard or may present their written comments during the said hearing, or may file written comments during normal business hours with the Zoning Administrator's Office prior to the date and time of the public hearing. Information regarding this meeting and the public hearing may be reviewed in the Zoning Administrator's Office from 8:30 A.M. to 12:00 P.M. and from 1:00 P.M. to 4:30 P.M. on any day not a holiday from Monday through Friday.

The City of Zeeland will provide necessary reasonable auxiliary aids and services, such as signers for the hearing impaired and audio tapes of printed materials being considered at the meeting, to individuals with disabilities at the meeting/hearing with a need for an accommodation, upon being provided with a notice to the City of Zeeland three days prior to the public hearing. Individuals with disabilities requiring auxiliary aids or services should contact the City of Zeeland by writing or calling the City Clerk's Office 772-6400.

Dated: April 20, 2026
Timothy Maday – Zoning Administrator

21 South Elm Street • Zeeland, Michigan 49464 • (616) 772-0872 • (616) 772-0880

MEMORANDUM

DATE: Friday, May 8, 2026

TO: Planning Commission

FROM: Tim Maday, Community Development Director

RE: May 11th Special Planning Commission meeting agenda – Site plan review and special land use application for Mead Johnson & Company, LLC – 725 E Main Ave – Campus modernization project

Background

On April 6, 2026, the City received a site plan review and special land use application from Mead Johnson & Company, LLC for a proposed campus modernization project. The application includes multiple parcels generally located along E Main Avenue, E Washington Avenue, and N Carlton Street.

Staff completed an initial review of the application and provided written comments to the applicant. The applicant submitted a response memo dated May 4, 2026 (enclosed in the meeting packet), along with revised plan materials addressing those comments.

This application is part of a broader redevelopment effort that has been discussed with the Planning Commission over the past year, including prior rezoning actions, temporary parking lot approvals, and the currently pending request to vacate a portion of N Division Street, which is associated with the overall site configuration for this project.

Description of Application

The applicant is requesting site plan review and special land use approval for an industrial facility campus modernization project within the I-2 General Industrial District.

The proposed project includes the construction of multiple industrial buildings of varying heights totaling approximately 619,000 square feet, along with associated site improvements including parking areas, internal vehicle circulation, truck access and loading areas, stormwater management systems, site lighting, landscaping and screening, utility infrastructure improvements, and related site infrastructure to support the proposed operations.

Summary of Staff Review / Ordinance Considerations

Staff has completed an initial review of the application and continues to work with the applicant and their consultants on outstanding items. Based on the revised plans and response materials, the project generally aligns with the requirements of the City's zoning ordinance, subject to the considerations outlined below.

Landscaping and Screening

The City's landscaping ordinance requires the installation of greenbelts along street frontages consisting of one canopy tree per 40 feet of frontage and a minimum 20-foot depth of landscaped area, in addition to interior parking lot landscaping requirements.

On Main Avenue, the greenbelt requirements are met. In addition, canopy trees that would otherwise be required within interior parking areas have been relocated to the Main Avenue frontage, resulting in additional screening and an enhanced streetscape.

On Carlton Street, the ordinance requires 18 canopy trees. The plan shows 16 canopy trees and 3 evergreen trees. The Planning Commission will need to determine whether this arrangement is acceptable or whether additional canopy trees should be required; if accepted, a waiver will be required to allow the substitution of evergreen trees.

On Washington Avenue, no formal greenbelt is currently in place or proposed. Staff does not believe that the limited scope of work along Washington Avenue, which is primarily related to parking use, warrants full reconstruction to install a greenbelt at this time. Staff would prefer to coordinate any future improvements along Washington Avenue with the applicant to ensure consistency with the City's Washington Avenue beautification plans.

With respect to parking lot landscaping, the ordinance requires canopy trees and landscaped areas based on the size of the parking lot. The applicant is proposing to relocate all required parking lot trees to the Main Avenue frontage due to operational constraints, including food safety considerations associated with the facility, and is not proposing vegetated interior landscape islands. Instead, paved landscape islands are proposed. The Planning Commission will need to consider a waiver from these requirements.

The site is generally screened from public view through a combination of the proposed Main Avenue greenbelt, relocated canopy trees, hedgerow plantings, and fencing located behind the landscaping.

Parking

The project includes a combination of existing parking areas, proposed parking improvements, and deferred parking areas.

Contractor parking is identified as temporary in nature and is proposed to be located on Washington Avenue, while primary employee parking is provided within the landscaped parking areas located to the south.

Deferred parking areas are shown for potential future use. These areas are not proposed to be constructed at this time. City ordinance allows deferred parking where the required number of parking spaces, based on building square footage and use, exceeds actual operational needs. Any activation of these deferred parking areas in the future would require compliance with applicable ordinance requirements, including landscaping and greenbelt standards.

Utilities and Consultant Review

The application was distributed to all relevant City departments and consultants for review.

Water and sanitary sewer review is ongoing, including coordination regarding system capacity, discharge locations, and monitoring requirements.

Stormwater plans were submitted to the Ottawa County Water Resources Commissioner's Office on May 4, 2026. Staff recommends that any site plan approval include a condition requiring approval from the County prior to issuance of building permits.

The City's consulting traffic engineer has reviewed the submitted traffic study and is continuing to coordinate with the applicant's engineer. Final traffic-related improvements and design should be subject to staff and consultant approval prior to issuance of building permits.

Staff will continue to work with the applicant and consultants to resolve outstanding technical items.

Key Issues / Outstanding Items

The following items remain under review or require action by the Planning Commission or other bodies:

Variances Required (Zoning Board of Appeals)
Building height: The I-2 district permits a maximum building height of 40 feet. Several proposed buildings exceed this height and will require variances.

Front yard fencing: Fencing within front yards is limited to three feet in height. The applicant is proposing an eight-foot fence around the site for security and safety purposes, which requires variance approval.

Front yard loading: Loading is not permitted within front yards. Multiple front yards exist, and loading is proposed within the west front yard, which is set back several hundred feet from the right-of-way. Variance approval will be required.

Waivers Requested (Planning Commission)
Parking lot landscaping: Waiver requested to allow paved landscape islands and relocation of required parking lot trees to the Main Avenue greenbelt.

Greenbelt tree substitution (Carlton Street): Waiver required to allow substitution of evergreen trees in place of required canopy trees.

Staff believes these waiver requests can be supported.

Ongoing Coordination
- Final traffic study review
- Stormwater approval from Ottawa County
- Utility design and system capacity determinations

Related Approvals
The proposed vacation of a portion of North Division Street has been recommended by the Planning Commission and is currently moving through the City Council process for consideration and final action.

Development Agreement
Due to the scale and complexity of the project, and the number of items involving coordination between public and private improvements, a development agreement will be required.

The development agreement is anticipated to address items including utility coordination, infrastructure improvements, and the design and implementation of the proposed greenspace/pocket park area. While the general layout of the greenspace has been identified, final design elements such as pavement treatments and amenities have not yet been finalized and are anticipated to be addressed through the development agreement.

Additional items may include coordination of easements, maintenance responsibilities, and other project-related improvements not directly governed by the site plan review process, including impacts to adjacent spaces such as the relocation of the Bethel playground.

Recommendation / Next Steps

This will be the Planning Commission's first opportunity to review and discuss the proposed site plan as a group, hear a presentation from the applicant, and receive public comment.

Staff has been working with the applicant over an extended period through multiple rounds of review, coordination, and plan revisions. Based on that work, staff believes the proposed site plan is generally consistent with the requirements of the City's zoning ordinance, subject to the outstanding items identified above.

Given the scale of the project and the level of public interest, staff is not requesting action from the Planning Commission at the May 11, 2026 meeting. This meeting is intended to allow the Commission to review the application, hear public input, and provide initial feedback and direction.

Should the Planning Commission feel comfortable taking action at the May 11 meeting, the following conditions should be included as part of any motion for approval:

- Approval of required variances by the Zoning Board of Appeals
- Approval of requested waivers by the Planning Commission
- Final traffic study review and approval by the City's consulting traffic engineer
- Approval of stormwater management plans by the Ottawa County Water Resources Commissioner's Office prior to issuance of building permits
- Final review and approval of utility design and system capacity by City staff and consultants
- Execution of a development agreement addressing project-related improvements and coordination items

If no action is taken at the May 11 meeting, staff will continue to work with the applicant to address outstanding items and incorporate feedback from the Planning Commission and public. A formal recommendation will then be presented for consideration, likely at the June 4, 2026 Planning Commission meeting.

I hope this memo is helpful in explaining the application that will come before the Commission on May 11th, and the related city ordinance considerations. Please do not hesitate to reach out with any questions you may have regarding this memo, the related application or anything else.

Mead Johnson Nutrition – Zeeland Modernization Masterplan

Project description

Mead Johnson & Company, LLC is one of the world's largest producers of infant formula. The Zeeland, Michigan plant has been in continuous operation since 1924 and has undertaken numerous expansions and modernizations over the years. This project is a major modernization of both the manufacturing and packaging operations, as well as employee amenities areas. The project includes:

(1) a new building to be constructed North of, and attached to, the existing plant that will house a new packaging line, and

(2) a new stand-alone facility to be built directly West of the existing buildings, and connected by walkways, on property recently acquired and rezoned to I-2 for this purpose. This new building will include manufacturing, packaging, warehousing, supporting utilities, and a new building housing office, laboratory, and employee amenities.

The project will also include associated sitework, utility installation, parking, and landscaping.

Requested Variances/Adjustments

Height Variance

Several Areas of the new facility exceed the code specified maximum height of 40' AGL. Much of the process equipment required to support our manufacturing requires this height with towers required for the spray dryer and blender. A Zoning Variance Request, similar to those approved for prior projects on site, has been prepared to be heard by the Zeeland Zoning Board of Appeals and is being submitted concurrently with this Site Plan Approval application.

Landscape Adjustments

FDA regulations under 21 CFR 117.20 require that the grounds surrounding a food processing plant be maintained in a manner that minimizes the potential for contamination from pests, dust, and debris. To support compliance with this requirement, large trees, shrubs, and similar vegetation cannot be placed immediately adjacent to buildings. Such plantings can create harborage areas for pests, support bird nesting, and interfere with proper drainage - each of which presents a potential risk to food safety.

In alignment with these regulatory expectations, Mead Johnson Nutrition takes additional precaution to eliminate or significantly reduce these risks. For the project referenced, we require that no trees, shrubs, grasses, or other greenscaped areas be positioned in close proximity to the facility. Consistent with our approach on other recent expansions, no trees or grasses will be placed within parking islands or buffer zones directly adjacent to the plant.

To balance these restrictions while still enhancing site aesthetics and environmental quality, we are increasing the quantity of trees and landscape plantings along the perimeter of the site. This approach supports regulatory compliance while providing meaningful visual and environmental benefits. These adjustments are detailed in the attached landscape plans.

Received: 04/06/26
City of Zeeland, MI

Parking Requirements

This modernization project includes purpose-built facilities that do not necessarily align with standard occupancy-per-square-foot benchmarks. As a result, the parking and site amenities have been designed specifically to support the operational requirements of the company, which may differ from standard code-based parking stall calculations. As part of the project planning process, a comprehensive analysis of staffing levels and shift schedules was completed to determine the actual on-site parking needs. This analysis is attached for reference.

The proposed employee main parking lot includes 377 regular (non ADA accessible) parking stalls, providing approximately 15% more capacity than the highest demand identified in the analysis. Because this lot will be controlled-access and reserved exclusively for employees, we are confident that this capacity will sufficiently support current operations as well as known future growth.

All contractors will be parking at the newly acquired building at 640 E. Washington Ave, entering the site from Washington Ave. There will be 91 contractors located at this site, with a lot capacity of 272 Spaces.

Additionally, should future operational changes create a need for more parking, adequate land is available within the property boundaries to allow for the development of additional parking areas. A deferred parking layout is also attached to illustrate this expansion capability.

Noise Abatement

As part of our efforts to optimize the site for Mead Johnson Nutrition operations while also supporting the quality of life for Zeeland residents and visitors, we have made several significant site adjustments that will substantially improve noise-reduction performance.

The most impactful change is the increased setback for all buildings. All manufacturing facilities are now positioned a minimum of 225 feet from the property line—far exceeding the required 50-foot setback. According to the 6-dB rule, this increased distance is estimated to reduce general facility noise by approximately 13 dB. In addition, the shipping docks and truck apron have been shifted farther away from N. Carlton Street, providing additional reduction in noise exposure.

Nearly as significant is the relocation of the Central Utility Building (CUB) and the cooling towers. These structures have been moved from the originally planned areas near N. Carlton Street to a more central location on the site, where they are naturally screened by other buildings. The CUB has shifted from roughly 200 feet to approximately 850 feet from N. Carlton Street, and the cooling tower from around 50 feet to approximately 850 feet. This relocation results in an estimated 24-dB noise reduction at the N. Carlton lot line.

As part of the overall landscaping plan, a close-rail aluminum fence and densely planted trees will further reduce noise levels along Main Avenue and the residential portion of N. Carlton Street by an additional 3–5 dB.

The City of Zeeland will not discriminate against any individual or group because of race, sex, religion, age, nation origin, color, marital status, handicap or political belief.

Please submit this application with checklist at least 30 days prior to the requested Planning Commission meeting (usually 1st Thursday of the month) along with 10 copies of the proposed site plan and related documents and an electronic file which may be submitted by email to buildinginspector@cityofzeeland.com**.** The applicant or a representative is required to present the application at the Planning Commission meeting.

I. PROPERTY INFORMATION

Property address **725 E Main Avenue**	Parcel number 70- **Multiple parcels, see civil sheet C101.**
Name of development **MEAD JOHNSON NUTRITION - ZEELAND MODERNIZATION MASTERPLAN**	Acreage **45.38 acres**

II. CONTACT INFORMATION

Property owner **Mead Johnson & Company LLC**	Contact **Kirk Sakel**
Phone **(618) 383-0359**	Email **kirk.sakel@reckitt.com**

Applicant **Allan Barron**	Company **Mead Johnson & Company LLC**		
Address **725 E Main Avenue**	City **Zeeland**	State **MI**	Zip **49464**
Phone **(847) 409-3536**	Email **allan.barron@reckitt.com**		
If applicant is other than owner, what is the relationship? **Sr. Manager, Engineering**			

Plan preparer **Dan Lewis**	Company **VK Civil**		
Address **7885 Byron Center Ave SW**	City **Byron Center**	State **MI**	Zip **49315**
Phone **(616) 277-2185**	Email **Dan@vkcivl.com**		

III. PROPOSED USE OF PROPERTY PROJECTED COST OF PROJECT $_____

Description of use of property/buildings to be constructed
See attached cover letter.

NOTE:
If an application is submitted in accordance with information required in Chapters 16 and 17 of the Zoning Ordinance on a Site Plan and Special Land Use application, thirty (30) days should be sufficient for required reviews and minor revisions necessary for action by the Planning Commission. Major revisions and/or additional reviews could delay placement on the agenda or action by the Planning Commission.

FEE Information:
The application filing fee for Site Plan Review and Special Land Use of $350 entitles the applicant to two (2) plan submissions, original and one (1) revision. Each additional submission over two (2) will require an additional filing fee equal to 50% of the original filing fee. Note: The applicant is liable for any attorney, engineering, or consultant fees incurred by the municipality and will be invoiced for any such charges. Fee for a Special Meeting of the Planning Commission is $700.

OTHER Approvals:
If it is determined that other agency approvals are required, it is the applicant's responsibility to obtain and submit written approvals from these reviewing agencies to the Zoning Administrator before the project may be approved.

PLAN Revisions:
After Planning Commission review of the plans, any such plans that are revised or changed must be resubmitted with a revision date and change list attached. Please indicate sheet number where revisions have been made.

ADDITIONAL Information:
The Planning Commission may request from the applicant any additional graphics or written materials, prepared by a qualified person to assist in determining the appropriateness of the site plan. Such material may include, but need not be limited to: aerial photography; photographs; estimated impact on public schools and utilities; traffic impacts; impact on significant natural features and drainage; soil tests; and estimated construction costs.

Planning Commission
SITE PLAN REVIEW & SPECIAL LAND USE
SITE PLAN CHECKLIST

The above application and plan(s) will be reviewed in accordance with the City Zoning Ordinance and other applicable City ordinances and regulations. The review will be conducted on a preliminary basis by the Zoning Administrator to determine if minimum information was provided on the site plan. The checklist below indicates the MINIMUM information that normally should be provided in the site plan in order for the application to be scheduled for hearing by the Planning Commission.

APPLICANT: PLEASE CHECK THE APPROPRIATE BOXES BELOW:

A. General Information

Provided	N/A (Not Applicable)	
☑	☐	1. Applicants – owners/occupant names, addresses, telephone numbers.
☑	☐	2. Date (Mo/Day/Yr) including revisions.
☑	☐	3. Block Title.
☑	☐	4. Scale.
☑	☐	5. Northpoint.
☑	☐	6. Location map drawn at a scale of 1"= 2000' with north point indicated.
☑	☐	7. Architect, Engineer, Surveyor, Landscape Architect, or Planner's name address and telephone number.
☑	☐	8. Existing lot line, building lines, structures, parking areas, etc. on the parcel and within 100 ft. of the site.
☑	☐	9. Proposed lot lines, property lines and all structures, parking areas, etc., within the site, and within 100 ft. the site.
☑	☐	10. Centerline and existing and proposed right-of-way lines of any street.
☑	☐	11. Zoning classification of petitioner's parcel and all abutting parcels.

B. Physical Features

Provided	N/A (not applicable)		
☐	☑	1.	Entrance and abutting street tapers, acceleration, deceleration and passing lanes and approaches. See traffic study.
☑	☐	2.	Proposed locations of access drives, street, intersections, driveway locations, sidewalks, bike-paths, curbing and areas for public use.
☐	☑	3.	Locations of existing and proposed service facilities above and below ground, including:
☐	☑		- Well sites.
☐	☑		- Septic systems. Location of the treatment systems, of the septic tank and the drain field (soil absorption system) should be clearly distinguished.
☑	☐		- Chemical and fuel storage tanks and containers.
☑	☐		- Storage, loading and disposal areas for chemicals, hazardous substance salt and fuels.
☑	☐		- Water mains, hydrants, pump houses, standpipes, and building services and sizes.
☑	☐		- Sanitary sewer and pumping stations.
☑	☐		- Storm water control facilities and structures including storm sewers, swales, retention and detention basins, drainage-ways and other facilities including calculations for sizes.
☑	☐		- Locations of all easements.
☑	☐		- Telephone/Communications/Cable.
☑	☐		- Gas Meter/Lines, etc.
☑	☐		- Electric/Transformers/Lines, etc.
☑	☐	4.	All structures with dimensioned floor plans, set-back & yard dimensions & typical elevation views, including building heights, etc.
☑	☐	5.	Dimensional parking spaces and calculations, drives and type of surfacing.
☑	☐	6.	Exterior lighting locations and illumination patterns.

B. Physical Features (continued)

Provided	N/A (not applicable)		
☑	☐	7.	Trash receptacle pad location and method of screening.
☑	☐	8.	Transformer pad location and method of screening.
☑	☐	9.	Dedicated road or service drive locations.
☑	☐	10.	Entrance details including sign location and size.
☑	☐	11.	Designation of fire lanes.
☑	☐	12.	Location of snow storage areas.

C. Landscaping, Greenbelts, Buffers and Screening

Provided	N/A (not applicable)		
☑	☐	1.	Separate Landscaping plan. - Location, spacing, size and descriptions for each plant type within required landscape areas. - Minimum scale: 1"=50' for property less than three acres, or 1"=100' for property three acres or more. - Typical straight cross section including slope, height and width of berms and type of groundcover, or height and type of construction of wall including footings. - Planting and staking details. - Identification of existing trees and vegetative cover to be preserved. - Identification of groundcover and method of planting. - Identification of landscape maintenance program. - Lawn sprinkling design.
☑	☐		
☑	☐		
☑	☐		
☑	☐		
☑	☐		
☑	☐		
☑	☐	2.	Screening between land uses. - Visual screening between conflicting land uses providing a total visual screen.

C. Landscaping, Greenbelts, Buffers and Screening (continued)

Provided	N/A (not applicable	
☐	☑	3. Parking lot landscaping.
☑	☐	- Landscaped areas within the parking lot(s).
☑	☐	- Landscaping between parking lot and adjacent private property.
		- Landscaping between parking lot and adjacent public property.
☑	☐	4. Greenbelt Buffers.
		- A strip of land with a minimum width determined by the front yard setback of the property's zoning classification, shall be located between abutting right-of-way of a public street, freeway, or major thoroughfare and the buildings.
☑	☐	- Trees within buffer area to be not less than twelve (12) feet in height or have a minimum caliper of 2-1/2 inches, whichever is greater, at the time of the planting.
☑	☐	- The remainder of the open area to be landscaped in natural landscape material.
☑	☐	- Date of landscape completion.

D. Natural Features

Provided	N/A (not applicable	
☑	☐	1. Soil characteristics of the parcel to be at least the detail provided by the U.S. Soil Conservation Service "Soil Survey of Ottawa County, Michigan, 1972".
☑	☐	2a. On parcels of more than one acre, existing topography with a maximum contour interval of two feet.
☑	☐	2b. Topography on the site and beyond the site for a distance of 100 feet in all directions should be indicated.

D. Natural Features (continued)

Provided	N/A (not applicable	
☑	☐	2c. Grading plan, showing finished contours at a maximum interval of two feet, correlated with existing contours so as to clearly indicate required cutting, filling and grading.
☑	☐	3. Location of existing drainage courses. and associated bodies of water, on and off site, and their elevations.
☑	☐	4. Location of existing wetlands to at least the detail indicated on the City of Zeeland zoning map.
☑	☐	5. Location of natural resource features including woodlands and areas with slopes greater than 10 percent (one foot of horizontal distance).

E. Additional Requirements for Multiple Family, Cluster and PUD Developments

Provided	N/A (not applicable)	
☐	☑	1. Density calculations by type of unit, by bedroom count.
☐	☑	2. Designation of units by type and number of units in each building.
☐	☑	3. Carport locations and details where proposed.
☐	☑	4. Specific amount and location of recreation spaces.
☐	☑	5. Type of recreation facilities to be provided in recreation space.
☐	☑	6. Details of community building and fencing of swimming pool if proposed.

F. Additional Requirements for Non-residential Developments

Provided	N/A (not applicable	
☑	☐	1. Loading/unloading areas.
☑	☐	2. Total and useable floor area.
☑	☐	3. Number of **occupants** during peak usage, i.e. shift change.
☑	☐	4. DNR Air Quality Permit attached. Air Permit submitted to EGLE by ERM
☑	☐	5. Noise abatement procedure/technique. See owner cover letter.

Planning Commission
SITE PLAN REVIEW & SPECIAL LAND USE
STANDARDS CHECKLIST

In reviewing, approving, disapproving or modifying the application and site plan, the Planning Commission and/or the Planning Commission Site Plan Review Committee shall be governed by the following standards, which the applicant is also asked to respond to:

		Yes	No	
a.	Is there a proper relationship between the existing streets and highways within the vicinity and proposed deceleration lanes, service drives, entrance and exit driveways and parking areas to insure the safety and convenience of pedestrian and vehicular traffic?	☑	☐	
b.	Are the buildings and structures proposed to be on the premises situated to minimize adverse effects upon owners and occupants of adjacent properties?	☑	☐	
c.	Will the natural features of the landscape be retained when they furnish a barrier or buffer between the project and adjoining properties and where they assist in preserving the general appearance of the neighborhood?	☑	☐	
d.	In the case of elderly housing, will there be sufficient open space on the site to provide additional off-street parking should the development revert to conventional housing in the future? This amount of reserved space shall be adequate in size to meet the parking requirements for multiple family housing set forth in Chapter 17 while maintaining conformance of the development to all other provisions of the Zoning Ordinance. A variance may be granted by the Zoning Board of Appeals for reserving off-street parking if the applicant can demonstrate that the project shall be permanently restricted to elderly housing.	☐	☐	N/A

	Yes	No	
e. Will any off-street parking be integrated with the use of existing off-street parking facilities in the vicinity of the development? The Planning Commission or the Planning Commission Site Plan Review Committee shall approve the Site Plan only when the developer has incorporated the use of alternate off-street parking facilities, such as municipal lots or lots which are used at non-conflicting times or days of the week.	☑	☐	
f. Have impacts, if any, of the proposed development which negatively affect adjoining residents or owners been minimized by appropriate screening, fencing, land-scaping, setback and location of buildings, structures and entryways.	☑	☐	
g. Have the buildings been situated to minimize any harmful or adverse effect which the development might otherwise have upon the surrounding neighborhood?	☑	☐	
h. Have all provisions of the City Zoning Ordinance been met? This would not preclude the applicant from applying for an appropriate variance with the Zoning Board of Appeals. The Planning Commission or the Planning Commission Site Plan Review Committee may conditionally approve a site plan subject to the granting of any appropriate variance.	☑	☐	See site plan variance drawings included in this package.

Planning Commission
SITE PLAN REVIEW & SPECIAL LAND USE

This application shall also include a drawn to scale site plan(s) that include the information listed below. The Zoning Administrator may authorize omissions as noted in the left margin.

OFFICE USE

_____ a) Applicant identification.
_____ b) Street address.
_____ c) North arrow.
_____ d) Size of property in square feet or acre.
_____ e) Property lines and dimensions.
_____ f) Location of significant natural features including wetlands, steep slopes, flood prone areas, unique vegetation, any other unusual features.
_____ g) Location of all structures on the land with location dimensions and building dimensions.
_____ h) Lot lines and all structures within one hundred feet (100') of the site's property lines including driveways and other access points along both sides of the street where access to the site is proposed.
_____ i) Identification of all rights-of-way and easements pertaining to the subject land and adjoining parcels.
_____ j) Copy of latest surveyor's engineering drawing.

The undersigned hereby certifies that the information given in this application and supplementary materials is true and correct to the best of their knowledge. It is also understood that any information requested, and not included with the application, may cause delays in a decision being made by the Planning Commission.

I hereby grant permission for members of the City of Zeeland Planning Commission to enter the above described property (or as described in the attached) for the purposes of gathering information related to this application/request/proposal. (**NOTE TO APPLICANT: This is optional and will not affect any decision on your application.)**

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Ottawa County, Michigan
Survey Area Data: Version 20, Sep 4, 2025

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Oct 4, 2022—Nov 7, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
AlA	Allendale sandy loam, 0 to 4 percent slopes	23.8	63.6%
ChB	Coloma loamy sand, 0 to 6 percent slopes	3.2	8.5%
GeA	Gladwin sandy loam, 0 to 2 percent slopes	1.6	4.4%
Hg	Hettinger loam	2.1	5.6%
McA	Mancelona loamy sand, 0 to 2 percent slopes	1.8	4.7%
Pn	Pinconning loamy sand	4.9	13.2%

PROJECT SITE INFORMATION:

1) PARCEL ADDRESS: 725 E MAIN AVENUE
2) PARCEL NUMBER: 70-17-18-400-041
3) TOTAL ACREAGE: 45.38
4) TOTAL ACREAGE TO BE DEVELOPED: 14.46
5) ZONING: INDUSTRIAL (I-2)
6) FLOODPLAIN - N/A (THIS PROJECT NOT IN THE 100 YEAR FLOOD PLAIN, BASED ON THE FEMA NATIONAL FLOOD MAPS.)
7) ADJACENT ZONING - NORTH I-2, EAST I-1&I-2, SOUTH R-1,C-2&I-2, WEST I-2,R-2
8) SETBACKS - FRONT 50', SIDES 40', REAR 25'
9) BUILDING HEIGHT MAXIMUM 40', BUILDING HEIGHT PROPOSED >40'; VARIANCE REQUIRED
10) MAXIMUM LOT COVERAGE 60%, LOT COVERAGE PROPOSED 37%
11) SIGNAGE, LIGHTING, AND LANDSCAPING SHALL MEET MUNICIPAL REQUIREMENTS.
12) SCREENING: ALL TRASH RECEPTACLES ARE INSIDE THE BUILDING. THERE ARE SOME RECYCLE COMPACTORS PLANNED FOR OUTSIDE THE BUILDING THAT WILL BE SCREENED FROM MAIN STREET BY AN ADJACENT RETAINING WALL AS WELL AS LANDSCAPING ALONG MAIN AND CARLTON.
13) USEABLE FLOOR AREA: MAIN BLDG - BLDG 66,67,68,69,70,71, & 77= 501,477 SF (6 STORIES) ZIPP ADDITION - BLDG 73 = 117,928 SF (5 STORIES)
14) OCCUPANTS AT PEAK USAGE: SHIFT CHANGES OCCUR AT 6AM AND 6PM AND CONSIST OF 165 EMPLOYEES AT A TIME. OFFICE EMPLOYEES WORK FROM 8AM TO 5PM AND ACCOUNT FOR 171 EMPLOYEES. THE MAXIMUM NUMBER OF OCCUPANTS WITHIN THE BUILDING AT ONE TIME WILL BE 165 + 171 = 336 EMPLOYEES. THERE IS A ONE HOUR BUFFER BETWEEN THE OFFICE EMPLOYEES LEAVING THE FACILITY AT 5PM AND THE NEXT SHIFT CHANGE AT 6PM. 385 PARKING SPACES HAVE BEEN PROVIDED ACCOUNTING FOR REGULAR EMPLOYEES, VISITORS, AND SHIFT CHANGES. PARKING CALCULATIONS ARE PROVIDED ON SHEET C300.

SURVEYOR'S NOTES

1) Flood Zone Classification: **An examination of the National Flood Insurance Program's Flood Insurance Rate Map for Community Number 260983, Panel Number 309, with an Effective Date of 12-16-2011, Map number 26139C0309E, shows this parcel to be located in Zone "X" Area of minimal flood hazard (subject to map scale uncertainty).**
2) Utility data shown hereon is a combination of as located utility flags and linework from a client provided CAD file. Nederveld Inc. makes no warranty to the accuracy or completeness of the provided utility information. Lacking excavation, the exact location of underground features cannot be accurately, completely, and reliably depicted. In addition, in some jurisdictions, 811 or other similiar utility locate requests from surveyors may be ignored or result in an incomplete response. Where additional or more detailed information is required, the client is advised that excavation may be necessary.
3) NOTE TO CONTRACTORS: 3 (THREE) WORKING DAYS BEFORE YOU DIG, CALL MISS DIG AT TOLL FREE 1-800-482-7171 FOR UTILITY LOCATIONS ON THE GROUND.
4) Wetland information was provided per client CAD file. At time of survey there were no delineated wetlands on site.
5) A portion of this survey was performed during a period of snow and ice covering. While every effort was made to locate all features, snow and/or ice may have prevented all features from being visible.

BENCHMARKS

BENCHMARK #501 ELEV. = 652.11 (NAVD 88)

BENCHMARK #3171 ELEV. = 653.79 (NAVD 88)
FLANGE BOLT ON HYDRANT ABOVE "MUELLER", 341' ± NORTH AND 174' ± WEST OF SOUTHEAST CORNER OF SECTION 18, TOWN 5 NORTH, RANGE 14 WEST

BENCHMARK #3199 ELEV. = 653.05 (NAVD 88)
FLANGE BOLT ON HYDRANT UNDER "TRAVERSE", 297' ± NORTH AND 254' ± WEST OF SOUTHEAST CORNER OF SECTION 18, TOWN 5 NORTH, RANGE 14 WEST

BENCHMARK #6201 ELEV. = 650.65 (NAVD 88)
FLANGE BOLT UNDER "A" OF "USA" ON HYDRANT, SOUTHWEST OF INTERSECTION OF E. MAIN AVE. AND N. CARLTON ST.

BENCHMARK #16051 ELEV. = 654.34 (NAVD 88)
FLANGE BOLT UNDER "A" OF "USA" ON HYDRANT, 32' ± SOUTH OF CENTERLINE E. MAIN AVE. & 33' ± WEST OF CENTERLINE DIVISION ST.

DESCRIPTION

Proposed New Overall Description:
Part of the Plat of Nagelkirk Addition to the City of Zeeland as recorded in Liber 14 of Plats, Page 11, Ottawa County Records and part of the Southeast 1/4 of Section 18, Town 5 North, Range 14 West, City of Zeeland, Ottawa County, Michigan, described as: Beginning at the Southeast corner of said Section; thence S89°55'55"W 1975.45 feet along the South line of said Section; thence N00°02'20"W 503.58 feet along the East line of N. Carlton Street; thence continuing along said East line Northeasterly 301.21 feet along a 603.21 foot radius curve to the right, said curve having a central angle of 28°36'37", and a chord bearing N14°03'37"E 298.09 feet; thence N88°30'57"E 201.60 feet; thence S02°15'12"E 106.14 feet to the Northwest corner of said Plat; thence N86°54'08"E 349.75 feet along the North line of said Plat to the Northeast corner thereof; thence N86°57'22"E 47.14 feet; thence N00°44'40"E 0.62 feet; thence S89°27'00"E 568.62 feet; thence N00°58'45"E 282.41 feet; thence S89°55'55"W 342.25 feet; thence N00°58'45"E 90.83 feet; thence S89°55'55"W 50.00 feet; thence N00°58'45"E 250.00 feet; thence N61°13'11"E 262.75 feet along the Southeasterly line of E. Washington Street; thence Southeasterly along the Southwesterly line of the former Chesapeake and Ohio Railroad spur track per HEI survey no. 79-02-050 dated 3-2-79, 613.25 feet along a 467.47 foot radius curve to the right, said curve having a central angle of 75°10'06", and a chord bearing S53°58'09"E 570.25 feet; thence N82°16'44"E 21.68 feet; thence Northwesterly along the Northeasterly line of the former Chesapeake and Ohio Railroad spur track per Quit Claim Deed 2009-0039837 recorded 10-02-09, 9.14 feet along a 497.52 foot radius curve to the left, said curve having a central angle of 01°03'09", and a chord bearing N17°34'37"W 9.14 feet; thence N81°16'06"E 429.74 feet; thence S00°59'06"W 1202.90 feet along the East line of said Section to the Point of Beginning. Contains 45.38 acres. Subject to easements, restrictions and rights-of-way of record. Also subject to highway right-of-way for Fairview Street over the most Easterly 33.00 feet thereof. Also subject to highway right-of-way for E. Main Avenue for that portion lying South of a line 33.00 feet North of and parallel to the centerline of said road, said centerline bearing N89°42'20"W from the Southeast corner of said Section.

Curve data for N. Carlton St.	Moore and Bruggink Project No. 35-3-6, Page 6, dated 4-11-95

NOTE: Deed and/or titlework was not available for some parcels both within the overall subject property and for some adjoining parcels. Tax Descriptions per Ottawa County GIS site were used in conjunction with the above referenced record descriptions when analyzing and configuring all of the parcels together.

SCHEDULE B - SECTION II NOTES

Sun Title Commitment No. 308852, dated 5-22-25

(10) Easement in favor of Consumers Power Company and the Covenants, Conditions and Restrictions contained in instrument recorded in Liber 1290, page 248.
The location of said easement cannot be determined from the record document.

(12) The terms, provisions and easement(s) contained in the document entitled Warranty Deed recorded as Liber 2293, page 166.
The location of said easement cannot be determined from the record document.

(13) Affidavit of Right of Way in favor of the County of Ottawa and the Covenants, Conditions and Restrictions contained in instrument recorded in Instrument No. 2013-0006185.
Said easement is not on, does not touch, and/or - based on the description contained in the record document - does not affect the surveyed property.

(14) Affidavit of Right of Way in favor of the County of Ottawa and the Covenants, Conditions and Restrictions contained in instrument recorded in Instrument No. 2013-0006189.
The easement described in this document is shown on this survey.

Sun Title Commitment No. 303898 Rev. No. 5, dated 12-10-24

[16] Right(s) of Way and/or Easement(s) and rights incidental thereto as granted in a document: Granted to Consumers Power Company (now known as Consumers Energy), Recording No. Liber 216, Page 565 (As to Parcel 1)
The location of said easement cannot be determined from the record document.

[17] Right(s) of Way and/or Easement(s) and rights incidental thereto, as granted in a document: Granted to: the City of Zeeland, a Michigan municipal corporation, Recording no. Liber 1412, Page 444 (AS to Parcel 1)
The easement described in this document is shown on this survey.

[18] Right(s) of Way and/or Easement(s) and rights incidental thereto, as granted in a document: Granted to: the Zeeland board of Public Works, a Department of the City of Zeeland, a Michigan municipal corporation, Recording No. 1815, Page 983 (As to Parcel 2)
The easement described in this document is shown on this survey.

[19] Water Main Easement, as recorded in Liber 1172, on Page 953. (As to Parcel 2)
The easement described in this document is shown on this survey, and is not on, does not touch, and/or - based on the description contained in the record document - does not affect the surveyed property.

[20] Right of way in favor of Consumers Power Company (now known as Consumers Energy), as recorded in Liber 1290, on Page 248. (As to Parcel 2)
The location of said easement cannot be determined from the record document.

[21] Right of way in favor of Consumers Power Company (now known as Consumers Energy), as recorded in Liber 1290, on Page 248. (As to Parcel 2)
The location of said easement cannot be determined from the record document.

Sun Title Commitment No. 306918 dated 3-7-25
No survey matters to depict

Sun Title Commitment No. 306919 dated 3-6-25

△10 Right of Way in favor of Consumers Power Company and the Covenants, Conditions and Restrictions contained in instrument recorded in Liber 254, page 309. Notice of Claim recorded in Liber 595, page 783.
The location of said easement cannot be determined from the record document.

△11 The terms, provisions and easement(s) contained in the document entitled Quitclaim Deed recorded September 12, 1988 as Liber 1290, page 248. Partial Release of Easement recorded in Liber 2545, page 478.
The location of said easement cannot be determined from the record document (L1290, P 248), and Surveyor has information indicating that said easement may have been released or otherwise terminated.(L2545, P478)

△14 Right-of-Way Grant in favor of Semco Energy and the Covenants, Conditions and Restrictions contained in instrument recorded in Instrument No. 2017-0002351.
The easement described in this document is shown on this survey.

Sun Title Commitment No. 303889 dated 11-4-24

⬡15 Right(s) of Way and/or Easement(s) and rights incidental thereto, as granted in a document: Granted to: the Board of Public Works, a Department of the City of Zeeland, a Michigan municipal corporation, Recording No: Liber 4763, Page 438.
The easement described in this document is shown on this survey.

⬡16 Easements and the terms, conditions and provisions thereof which are recited in the Affidavit of Right of Way recorded in Instrument No. 2013-0006189.
The easement described in this document is shown on this survey.

DEMOLITION KEY NOTES

1. REMOVE STORM SEWER
2. REMOVE CB
3. REMOVE SANITARY SEWER
4. REMOVE MANHOLE
5. REMOVE ELECTRIC HANDHOLE
6. REMOVE ELECTRIC.
7. REMOVE GATE ARM, CONTROLS, AND BOLLARDS.
8. REMOVE FENCE
9. REMOVE HMA PAVEMENT FULL DEPTH.
10. REMOVE CONCRETE PAVEMENT FULL DEPTH.
11. REMOVE GRAVEL FULL DEPTH.
12. REMOVE CONC. CURB AND GUTTER.
13. REMOVE SIGN.
14. REMOVE AC UNIT.
15. REMOVE GAS METER.
16. REMOVE GAS SERVICE.
17. REMOVE WATERMAIN.
18. REMOVE HYDRANT AND VALVES.
19. CAP ALL HOUSE UTILITY SERVICE LEADS AT ROW LINE.
20. REMOVE RIP RAP AND FLARED END SECTION.
21. REMOVE LIGHT POLE AND CONDUIT.
22. REMOVE CLEANOUT
23. REMOVE TREES

PARKING COUNTS REQUIRED BY CITY ZEELAND:

OFFICE (1 PER 300 SQ. FT. OF USABLE FLOOR AREA)
MANUFACTURING, PROCESSING, AND RESEARCH (1 SPACE PER 1,000 SQ. FT. OF GROSS FLOOR AREA)
WAREHOUSE (1 SPACE PER 2,000 SQ. FT. OF GROSS AREA)

EXISTING ZIPP & ZSP:
OFFICE: (19175 SQ. FT.)(1/300)=64 SPACES
MANUFACTURING: (123,915 SQ. FT)(1/1000)=124 SPACES
WAREHOUSING: (27,550+24,175 SQ. FT.)=124 SPACES

(BLDG 66, 67, 68, 69, 70, 71, & 77)
OFFICE: (60,536 SQ. FT.)(1/300)=202 SPACES
MANUFACTURING: 426,105 SQ. FT. (1/1000)=427 SPACES
WAREHOUSE: (14,836 SQ. FT.)(1/2000)=8

ZIPP ADDITION (BLDG 73)
MANUFACTURING: (117,927 SQ. FT.)(1/1000)=118 SPACES

PARKING CALCULATION:
REQUIRED PARKING = 755 SPACES (BLDG 66, 67, 68, 69, 70, 71, & 77)
PROVIDED PARKING:
REGULAR SPACES =337
ADA SPACES = 8
EV SPACES = 40 (10% OF TOTAL)
TOTAL SPACES = 385

SITE LAYOUT NOTES:

1) ALL WORK SHALL BE DONE TO ALL FEDERAL, STATE, AND LOCAL LAWS, RULES, AND REGULATIONS.
2) ALL WORK WITHIN ROW SHALL BE DONE IN ACCORDANCE WITH LOCAL ROADWAY JURISDICTION REQUIREMENTS.
3) CONTRACTOR SHALL RESTORE ALL STREET SURFACES, DRIVEWAYS, CULVERTS, ROADSIDE DRAINAGE, AND OTHER INFRASTRUCTURE DISTURBED OR DAMAGED DUE TO CONSTRUCTION ACTIVITIES TO MATCH EXISTING CONDITIONS.
4) ALL DEBRIS SHALL BE REMOVED FROM THE SITE, AND NO STOCKPILING ON SITE SHALL BE ALLOWED UNLESS APPROVED BY OWNER.
5) THE CONTRACTOR SHALL LIMIT SAWCUT AND PAVEMENT REMOVAL TO ONLY THOSE AREAS WHERE REQUIRED OR AS SHOWN. ALL PAVEMENTS TO BE REMOVED SHALL BE SAWCUT AND REMOVED TO FULL DEPTH AT ALL PAVEMENT LIMITS OR EXISTING JOINTS. IF ANY DAMAGE IS OCCURRED TO ANY OF THE SURROUNDING PAVEMENT, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ITS REMOVAL AND REPAIR AT NO ADDITIONAL COST.
6) CONTRACTOR SHALL CONTACT MISS DIG THREE WORKING DAYS BEFORE YOU DIG. CALL MISS DIG AT 1-800-482-7171 OR 811.
7) ALL WORK SHALL BE DONE TO THE MICHIGAN HANDICAPPED ACCESSIBILITY CODE AND THE AMERICANS WITH DISABILITIES ACT.
8) ADA PARKING SPACES SHALL BE MARKED WITH APPROVED PAVEMENT SYMBOL. MARK ADA SPACES WITH 4" BLUE PAINT AND SIGNS PER MMUTCD.
9) CONTRACTOR SHALL ENSURE ALL ADA RAMPS AND ACCESS MEET CURRENT ADA STANDARDS. IF IT IS DISCOVERED THAT ANY ITEMS WILL NOT MEET ADA STANDARDS IT SHALL BE BROUGHT TO THE ENGINEER'S ATTENTION.
10) ALL SIGNAGE SHALL BE PER MDOT AND MMUTCD STANDARDS.
11) THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL PERMITS, PERMIT COSTS, DEMOLITION PERMITS, TAP FEES, ASSESSMENTS, UTILITY PERMITS, ROW PERMITS, BONDS, INSURANCE, OR OTHER FEES ASSOCIATED WITH CONSTRUCTION.
12) SITE CONCRETE TO HAVE A COMPRESSIVE STRENGTH OF A MINIMUM 4000 PSI AND SHALL HAVE LIMESTONE AGGREGATE AND SHALL HAVE A 5.5%-8% AIR ENTRAINMENT WITH A BROOM FINISH.
13) INSTALL EXPANSION JOINTS AT ALL LOCATIONS WHERE CONCRETE ABUTS HMA PAVEMENT.
14) CONTRACTOR SHALL REVIEW THE GEOTECHNICAL AND ENVIRONMENTAL REPORTS FOR THE SITE AND INCORPORATE INTO THEIR CONSTRUCTION MEANS AND METHODS.
15) THESE PLANS HAVE BEEN DEVELOPED FOR ELECTRONIC FIELD SURVEY LAYOUT. DIMENSIONS SHOWN ARE FOR GRAPHIC PRESENTATION ONLY AND SHOULD NOT BE USED FOR LAYOUT. CONTACT THE ENGINEER IF ANY DISCREPANCIES BETWEEN THE PLAN AND ELECTRONIC DATA ARE DISCOVERED.
16) THE WORK LIMITS SHOWN ON THESE PLANS ARE FOR PHYSICAL CONSTRUCTION ONLY. THE CONTRACTOR SHALL PROVIDE ALL NECESSARY LIGHTS, BARRICADES, FLAGMEN, ETC. AS REQUIRED FOR THE WORK. INSTALLATION AND OPERATION OF ALL TEMPORARY TRAFFIC CONTROL AND TEMPORARY TRAFFIC CONTROL DEVICES SHALL BE PROVIDED BY THE CONTRACTOR WHETHER INSIDE OR OUTSIDE THESE WORK LIMITS.
17) THE CONTRACTOR SHALL PROTECT LOCATION OF ALL PROPERTY MARKERS AND BENCHMARKS.
18) THE CONTRACTOR IS RESPONSIBLE FOR ALL SIGNS, BARRICADES, AND SAFETY FENCES TO DETER PEOPLE FROM ENTERING THE WORK AREA AND FOR MAINTAINING AND PROTECTING THE FLOW OF VEHICULAR AND PEDESTRIAN TRAFFIC AROUND THE JOB SITE. TRAFFIC CONTROL SHALL BE COORDINATED WITH THE LOCAL POLICE DEPARTMENT AND MUNICIPALITY.
19) PRIOR TO CONSTRUCTION OR GRADING A PROTECTIVE BARRIER, FENCE, POST, AND SIGNS CLEARLY INDICATING LIMITS OF DISTURBANCE SHALL BE INSTALLED INDICATING NO TREE REMOVAL OR DISTURBANCES OUTSIDE LIMITS.
20) NO PARKING OF CONTRACTOR OR SUBCONTRACTORS SHALL BE ALLOWED ON PUBLIC STREETS WITHOUT PRIOR APPROVAL.
21) NO BUILDING MATERIAL, EQUIPMENT, VEHICLES, OR CHEMICALS SHALL BE STORED OR PLACED OUTSIDE OF THE LIMITS OF DISTURBANCE.
22) CONSTRUCTION NOISE SHALL BE KEPT TO A MINIMUM DURING NIGHTTIME HOURS AND MUST COMPLY WITH LOCAL MUNICIPAL ORDINANCES.
23) ALL VERTICAL FACE OF CURBS SHALL BE PAINTED YELLOW WHEN BETWEEN 0 AND 6 INCHES TALL.

GRADING PLAN NOTES:

1) SOILS EXPOSED IN THE BASE OF ALL SATISFACTORY FOUNDATION EXCAVATIONS SHOULD BE PROTECTED AGAINST ANY DETRIMENTAL CHANGES IN CONDITION SUCH AS FROM DISTURBANCE, RAIN AND FREEZING. SURFACE RUN-OFF WATER SHOULD BE DRAINED AWAY FROM THE EXCAVATION AND NOT ALLOWED TO POND. IF POSSIBLE, ALL FOOTING CONCRETE SHOULD BE POURED THE SAME DAY THE EXCAVATION IS MADE. IF THIS IS NOT PRACTICAL, THE FOOTING EXCAVATIONS SHOULD BE ADEQUATELY PROTECTED.
2) REMOVE ALL SUBGRADE MATERIAL THAT MAY BE SOFTENED BY RAINS, FREEZING, OR CONSTRUCTION TRAFFIC, ETC, AND REPLACE WITH COMPACTED GRANULAR FILL.
3) ALL CONSTRUCTION METHODS SHALL BE DONE IN COMPLIANCE WITH MDOT-EGLE. THE OWNER SHALL BE RESPONSIBLE FOR OBTAINING A "SOIL EROSION PERMIT" FROM THE COUNTY AND A "PERMIT BY RULE/NOTICE OF COVERAGE" FROM EGLE IF APPLICABLE, PRIOR TO THE START OF CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLYING WITH ALL REQUIREMENTS OF THE COUNTY "SOIL EROSION PERMIT" AND FOR ALL CERTIFIED STORM WATER INSPECTION SERVICE REQUESTED BY THE "PERMIT BY RULE." EROSION CONTROL MEASURES SHOWN ON THE PLANS ARE THE MINIMUM REQUIREMENTS AND SHALL NOT RELIEVE THE CONTRACTORS RESPONSIBILITY FOR PROVIDING ALL REQUIRED EROSION CONTROL MEASURES.
4) AVOID UNNECESSARY DISTURBING OR REMOVING OF EXISTING VEGETATED TOPSOIL OR EARTH COVER, THESE COVER AREAS ACT AS SEDIMENT FILTERS.
5) ALL TEMPORARY SOIL EROSION PROTECTION SHALL REMAIN IN PLACE UNTIL REMOVAL IS REQUIRED FOR FINAL CLEAN UP AND APPROVAL.
6) GEOTEXTILE SILT FENCE SHALL BE INSTALLED AS REQUIRED WHEN CROSSING CREEKS OR WHEN ADJACENT TO WETLANDS OR SURFACE WATER BODIES TO PREVENT SILTATION AND ELSE WHERE AS DIRECTED BY THE ENGINEER. SEEDING AND/OR SODDING SHALL BE INSTALLED ON CREEK BANKS IMMEDIATELY AFTER CONSTRUCTION TO PREVENT EROSION.
7) CONTRACTOR SHALL TAKE PRECAUTIONS TO AVOID TRACKING SOIL ONTO ADJACENT ROADWAYS. CONTRACTOR SHALL SWEEP IMMEDIATELY IF THIS OCCURS.
8) ANY DISTURBED AREA WHICH WILL BE LEFT UNWORKED 20 DAYS OR LONGER MUST BE SEEDED TO ESTABLISH VEGETATION FOR TEMPORARY STABILIZATION. BASINS TO BE SEEDED AND MULCH BLANKETS APPLIED IMMEDIATELY TO PROVIDE A STABLE BASE AND AVOID EXCESSIVE EROSION.
9) ALL SOIL EROSION CONTROL MEASURES ARE TO BE IN PLACE PRIOR TO THE START OF ANY GRADING.
10) ALL NON PAVED AREAS TO BE TOPSOILED (6" MIN.) & SEEDED.
11) VARIATION IN EXISTING SOIL CONDITIONS MAY IMPACT THE EARTHWORK QUANTITIES IF UNUSABLE SOILS ARE ENCOUNTERED DURING CONSTRUCTION.
12) DUST CONTROL: THE CONTRACTOR SHALL SUPPLY ALL LABOR, MATERIALS, AND EQUIPMENT NECESSARY SUCH AS CALCIUM CHLORIDE, WATER OR A MOTORIZED DUST-FREE STREET SWEEPING DEVICE TO MAINTAIN ALL ROADWAYS BEING USED FOR ACCESS TO THE CONSTRUCTION SITE AND SHALL ADHERE TO ALL ORDINANCES OF THE TOWNSHIP, COUNTY, EGLE OR ANY OTHER GOVERNMENT AGENCY.
13) IF MUD, SOIL OR OTHER DEBRIS IS DEPOSITED ON ADJACENT STREETS, ROADS OR OTHER PROPERTY, THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REMOVAL OF SUCH AT THE END OF EACH WORK DAY OR AS REQUIRED DURING THE WORK DAY.
14) STORMWATER POLLUTION PREVENTION ITEMS SHALL BE IN PLACE PRIOR TO COMMENCING CLEARING OPERATIONS, EARTHWORK GRADING, OR ANY OTHER TYPE OF CONSTRUCTION ACTIVITY.
15) CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLYING WITH THE SOIL EROSIONS AND SEDIMENT CONTROL PERMIT.
16) PLACE TEMPORARY EROSION CONTROL MEASURES PRIOR TO EARTH MOVING ACTIVITIES.
17) MULCH BLANKETS SHALL BE PLACED, STAPLED, AND OVERLAPPED ON ALL SLOPES THAT ARE 1 ON 3 OR GREATER AFTER.
18) CONTRACTOR TO INSTALL SILT SACK IN ALL CATCH BASINS ONCE THEY ARE CONSTRUCTED.
19) ALL SOIL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE INSPECTED BY A CERTIFIED STORM WATER OPERATOR AND MAINTAINED BY CONTRACTOR EVERY 7 DAYS AND AFTER EVERY SIGNIFICANT RAIN EVENT IN ACCORDANCE WITH NPDES PERMIT BY RULE REQUIREMENTS IF APPLICABLE.
20) EROSION CONTROL MEASURES SHALL REMAIN IN PLACE UNTIL VEGETATION IS ESTABLISHED.
21) BEST MANAGEMENT PRACTICES WILL BE UTILIZED DURING AND AFTER CONSTRUCTION OF THE PROJECT. MEASURES WILL INCLUDE THE USE OF SILT FENCING, SEEDING AND MULCHING, SEDIMENT INLET FILTERS, COMPACTION AND PAVING. THE OWNER OF THE SUBJECT PARCEL SHALL HAVE THE RESPONSIBILITY TO MAINTAIN THE PERMANENT SOIL EROSION PROTECTION MEASURES.
22) ANY POND AREA LABELED AS 'INFILTRATION' OR 'RETENTION' SHALL BE CONSTRUCTED IN A MANNER AS TO MINIMIZE COMPACTION OF EXISTING SUBGRADE. CONTRACTOR SHALL PROTECT AREA FROM COMPACTION PRIOR TO INSTALLATION AND THROUGHOUT CONSTRUCTION. IF NECESSARY, EXCAVATE BASIN BOTTOM TO AN UNCOMPACTED SUBGRADE FREE OF ROCKS AND DEBRIS AND ENSURE A SANDY BOTTOM. DO NOT COMPACT SUBGRADE. SEED AND STABILIZE THE BASIN WITH AN MDOT TDS SEED MIXTURE OR MEADOW MIX AS APPROVED BY THE ENGINEER.

UTILITY PLAN NOTES:

1) CONTRACTOR SHALL CONTACT PRIVATE AND PUBLIC UTILITY COMPANIES IF ANY COORDINATION IS NEEDED BETWEEN PROPOSED WORK AND EXISTING UTILITIES.
2) UTILITIES SHOWN (IF ANY) ARE APPROXIMATE LOCATIONS DERIVED FROM MEASUREMENTS OR AVAILABLE RECORDS. THIS MAP IS NOT TO BE INTERPRETED AS SHOWING EXACT LOCATIONS OR SHOWING ALL UTILITIES IN THE AREA. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF EXISTING UTILITY INFORMATION. THE CONTRACTOR SHALL FIELD VERIFY FOR ACCURACY, LOCATION, AND CONDITION.
3) ALL WATERMAIN TO BE CONSTRUCTED IN ACCORDANCE WITH LOCAL WATER UTILITY STANDARDS AND EGLE STANDARDS.
4) ALL SANITARY SEWER TO BE CONSTRUCTED IN ACCORDANCE WITH LOCAL SANITARY SEWER UTILITY STANDARDS AND EGLE STANDARDS.
5) ALL 6" UNDERDRAIN TO BE CORRUGATED PLASTIC PIPE WITH SOCK, ADS N-12 OR APPROVED EQUAL.
6) ALL STORM SEWER SHALL BE SMOOTH LINED CORRUGATED PLASTIC PIPE, ADS N-12 OR EQUAL, UNLESS OTHERWISE LABELED ON THE PLANS.
7) ALL EXISTING CASTINGS FOR STRUCTURES TO BE ADJUSTED OR RECONSTRUCTED TO GRADE SHALL BE FIELD VERIFIED AT THE TIME OF CONSTRUCTION AND MARKED SUITABLE FOR SALVAGE AND REUSE OR REPLACED.
8) ROOF DRAINS, FOUNDATION DRAINS, AND OTHER CLEAN WATER CONNECTIONS TO THE SANITARY SEWER ARE PROHIBITED.
9) CATCH BASINS WITHIN CONCRETE HEAD CURB SHALL HAVE EJ 7045 CASTINGS.
10) CATCH BASINS WITHIN BIT VALLEY CURB SHALL HAVE EJ 7065 CASTINGS WITH M1 GRATE.
11) CATCH BASINS WITHIN PAVED AREAS SHALL HAVE EJ 1020M1 RADIAL FLATE GRATE CASTINGS.
12) STORM SEWER MANHOLES SHALL HAVE EJ 1020 CASTINGS WITH SOLID COVERS.
13) STORM SEWER YARD DRAINS SHALL HAVE EJ 6508 CASTINGS.
14) ROOF DRAINS SHALL BE PVC SCH-40.
15) CONTRACTOR IS TO UNCOVER AND VERIFY ALL TAP LOCATIONS AND INVERTS. LOCATION AND INVERT DISCREPANCIES SHALL BE BROUGHT TO THE ENGINEERS ATTENTION FOR RESOLUTION PRIOR TO CONTINUING WORK.
16) SANITARY AND STORM STRUCTURES SHALL BE PRECAST AND HAVE A MAXIMUM OF 2 ADJUSTING RINGS FOR FINISH GRADE ADJUSTMENT.
17) THE CONTRACTOR SHALL MAINTAIN EXISTING UTILITY SERVICE TO ALL ADJOINING PROPERTIES.

MC-7200 STORMTECH CHAMBER SPECIFICATIONS

1. CHAMBERS SHALL BE STORMTECH MC-7200.
2. CHAMBERS SHALL BE ARCH-SHAPED AND SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
3. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 60x101.
4. CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NC INTERNAL SUPPORTS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
5. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
6. CHAMBERS SHALL BE DESIGNED, TESTED AND ALLOWABLE LOAD CONFIGURATIONS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS". LOAD CONFIGURATIONS SHALL INCLUDE: 1) INSTANTANEOUS (<1 MIN) AASHTO DESIGN TRUCK LIVE LOAD ON MINIMUM COVER 2) MAXIMUM PERMANENT (75-YR) COVER LOAD AND 3) ALLOWABLE COVER WITH PARKED (1-WEEK) AASHTO DESIGN TRUCK.
7. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 500 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.
8. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. UPON REQUEST BY THE SITE DESIGN ENGINEER OR OWNER, THE CHAMBER MANUFACTURER SHALL SUBMIT A STRUCTURAL EVALUATION FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE AS FOLLOWS:
   - THE STRUCTURAL EVALUATION SHALL BE SEALED BY A REGISTERED PROFESSIONAL ENGINEER.
   - THE STRUCTURAL EVALUATION SHALL DEMONSTRATE THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY SECTIONS 3 AND 12.12 OF THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS FOR THERMOPLASTIC PIPE.
   - THE TEST DERIVED CREEP MODULUS AS SPECIFIED IN ASTM F2418 SHALL BE USED FOR PERMANENT DEAD LOAD DESIGN EXCEPT THAT IT SHALL BE THE 75-YEAR MODULUS USED FOR DESIGN.
9. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.
10. MANIFOLD SIZE TO BE DETERMINED BY SITE DESIGN ENGINEER. SEE TECHNICAL NOTE 6.32 FOR MANIFOLD SIZING GUIDANCE. DUE TO THE ADAPTATION OF THIS CHAMBER SYSTEM TO SPECIFIC SITE AND DESIGN CONSTRAINTS, IT MAY BE NECESSARY TO CUT AND COUPLE ADDITIONAL PIPE TO STANDARD MANIFOLD COMPONENTS IN THE FIELD.
11. ADS DOES NOT DESIGN OR PROVIDE MEMBRANE LINER SYSTEMS. TO MINIMIZE THE LEAKAGE POTENTIAL OF LINER SYSTEMS, THE MEMBRANE LINER SYSTEM SHOULD BE DESIGNED BY A KNOWLEDGEABLE GEOTEXTILE PROFESSIONAL AND INSTALLED BY A QUALIFIED CONTRACTOR.

IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-7200 CHAMBER SYSTEM

1. STORMTECH MC-7200 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTATIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
2. STORMTECH MC-7200 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH INSTALLATION GUIDE MC-7200 CHAMBER".
3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR EXCAVATOR SITUATED OVER THE CHAMBERS. STORMTECH RECOMMENDS 3 BACKFILL METHODS:
   - STONESHOOTER LOCATED OFF THE CHAMBER BED.
   - BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   - BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
6. MAINTAIN MINIMUM - 9" (230 mm) SPACING BETWEEN THE CHAMBER ROWS.
7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS.
8. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE; AASHTO M43 #3, 357, 4, 467, 5, 56, OR 57.
9. STONE SHALL BE BROUGHT UP EVENLY AROUND CHAMBERS SO AS NOT TO DISTORT THE CHAMBER SHAPE. STONE DEPTHS SHOULD NEVER DIFFER BY MORE THAN 12" (300 mm) BETWEEN ADJACENT CHAMBER ROWS.
10. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING.
11. THE CONTRACTOR MUST REPORT ANY DISCREPANCIES WITH CHAMBER FOUNDATION MATERIAL BEARING CAPACITIES TO THE SITE DESIGN ENGINEER.
12. ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

NOTES FOR CONSTRUCTION EQUIPMENT

1. STORMTECH MC-7200 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH INSTALLATION GUIDE MC-7200 CHAMBER".
2. THE USE OF EQUIPMENT OVER MC-7200 CHAMBERS IS LIMITED:
   - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
   - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH INSTALLATION GUIDE MC-7200 CHAMBER".
   - WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH INSTALLATION GUIDE MC-7200 CHAMBER".
3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-800-821-6710 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

MC-3500 STORMTECH CHAMBER SPECIFICATIONS

1. CHAMBERS SHALL BE STORMTECH MC-3500.
2. CHAMBERS SHALL BE ARCH-SHAPED AND SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
3. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 45x76 DESIGNATION SS.
4. CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORTS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
5. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) SHORT-DURATION LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
6. CHAMBERS SHALL BE DESIGNED, TESTED AND ALLOWABLE LOAD CONFIGURATIONS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS". LOAD CONFIGURATIONS SHALL INCLUDE: 1) INSTANTANEOUS (<1 MIN) AASHTO DESIGN TRUCK LIVE LOAD ON MINIMUM COVER 2) MAXIMUM PERMANENT (75-YR) COVER LOAD AND 3) ALLOWABLE COVER WITH PARKED (1-WEEK) AASHTO DESIGN TRUCK.
7. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 500 LBS/FT/%. THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.
8. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. UPON REQUEST BY THE SITE DESIGN ENGINEER OR OWNER, THE CHAMBER MANUFACTURER SHALL SUBMIT A STRUCTURAL EVALUATION FOR APPROVAL BEFORE DELIVERING CHAMBERS TO THE PROJECT SITE AS FOLLOWS:
   - THE STRUCTURAL EVALUATION SHALL BE SEALED BY A REGISTERED PROFESSIONAL ENGINEER.
   - THE STRUCTURAL EVALUATION SHALL DEMONSTRATE THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD, THE MINIMUM REQUIRED BY ASTM F2787 AND BY SECTIONS 3 AND 12.12 OF THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS FOR THERMOPLASTIC PIPE.
   - THE TEST DERIVED CREEP MODULUS AS SPECIFIED IN ASTM F2418 SHALL BE USED FOR PERMANENT DEAD LOAD DESIGN EXCEPT THAT IT SHALL BE THE 75-YEAR MODULUS USED FOR DESIGN.
9. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.
10. MANIFOLD SIZE TO BE DETERMINED BY SITE DESIGN ENGINEER. SEE TECHNICAL NOTE 6.32 FOR MANIFOLD SIZING GUIDANCE. DUE TO THE ADAPTATION OF THIS CHAMBER SYSTEM TO SPECIFIC SITE AND DESIGN CONSTRAINTS, IT MAY BE NECESSARY TO CUT AND COUPLE ADDITIONAL PIPE TO STANDARD MANIFOLD COMPONENTS IN THE FIELD.
11. ADS DOES NOT DESIGN OR PROVIDE MEMBRANE LINER SYSTEMS. TO MINIMIZE THE LEAKAGE POTENTIAL OF LINER SYSTEMS, THE MEMBRANE LINER SYSTEM SHOULD BE DESIGNED BY A KNOWLEDGEABLE GEOTEXTILE PROFESSIONAL AND INSTALLED BY A QUALIFIED CONTRACTOR.

IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-3500 CHAMBER SYSTEM

1. STORMTECH MC-3500 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTATIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
2. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH INSTALLATION GUIDE MC-3500 & MC-4500 CHAMBER".
3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR AN EXCAVATOR SITUATED OVER THE CHAMBERS. STORMTECH RECOMMENDS 3 BACKFILL METHODS:
   - STONESHOOTER LOCATED OFF THE CHAMBER BED.
   - BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   - BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
6. MAINTAIN MINIMUM - 6" (150 mm) SPACING BETWEEN THE CHAMBER ROWS.
7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS.
8. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE; AASHTO M43 #3, 357, 4, 467, 5, 56, OR 57.
9. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING.
10. THE CONTRACTOR MUST REPORT ANY DISCREPANCIES WITH CHAMBER FOUNDATION MATERIALS BEARING CAPACITIES TO THE SITE DESIGN ENGINEER.
11. ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

NOTES FOR CONSTRUCTION EQUIPMENT

1. STORMTECH MC-3500 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH INSTALLATION GUIDE MC-3500 & MC-4500 CHAMBER".
2. THE USE OF EQUIPMENT OVER MC-3500 CHAMBERS IS LIMITED:
   - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
   - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH INSTALLATION GUIDE MC-3500 & MC-4500 CHAMBER".
   - WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH INSTALLATION GUIDE MC-3500 & MC-4500 CHAMBER".
3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-800-821-6710 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

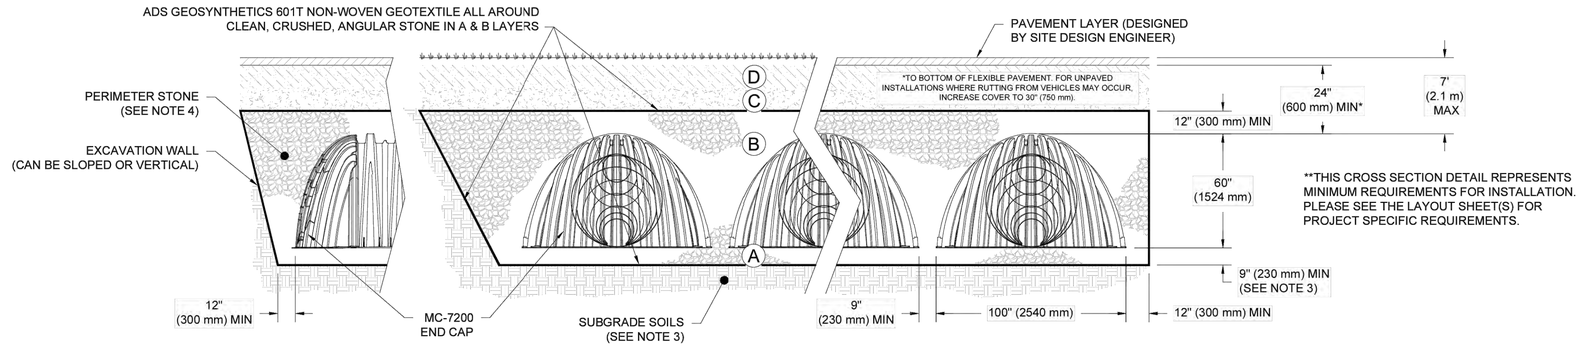
DRAWING NUMBER: C615
SHEET: 34 OF 40

Received: 05/04/26
City of Zeeland, MI

ACCEPTABLE FILL MATERIALS: STORMTECH MC-7200 CHAMBER SYSTEMS

	MATERIAL LOCATION	DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	**FINAL FILL:** FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	**INITIAL FILL:** FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 24" (600 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	AASHTO M145[1] A-1, A-2-4, A-3 OR AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 24" (600 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
B	**EMBEDMENT STONE:** FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED
A	**FOUNDATION STONE:** FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE OR RECYCLED CONCRETE[5]	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE.[2,3]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 9" (230 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.
4. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.
5. WHERE RECYCLED CONCRETE AGGREGATE IS USED IN LAYERS 'A' OR 'B' THE MATERIAL SHOULD ALSO MEET THE ACCEPTABILITY CRITERIA OUTLINED IN TECHNICAL NOTE 6.20 "RECYCLED CONCRETE STRUCTURAL BACKFILL".



**THIS CROSS SECTION DETAIL REPRESENTS MINIMUM REQUIREMENTS FOR INSTALLATION. PLEASE SEE THE LAYOUT SHEET(S) FOR PROJECT SPECIFIC REQUIREMENTS.

NOTES:

1. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 60x101
2. MC-7200 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS. REFERENCE STORMTECH DESIGN MANUAL FOR BEARING CAPACITY GUIDANCE.
4. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
5. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3" (75 mm).
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT AS DEFINED IN SECTION 6.2.8 OF ASTM F2418 SHALL BE GREATER THAN OR EQUAL TO 500 LBS/FT/%. AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.

MC-7200 ISOLATOR ROW PLUS DETAIL
NTS

INSPECTION & MAINTENANCE

STEP 1) INSPECT ISOLATOR ROW PLUS FOR SEDIMENT
- A. INSPECTION PORTS (IF PRESENT)
  - A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN
  - A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED
  - A.3. USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
  - A.4. LOWER A CAMERA INTO ISOLATOR ROW PLUS FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)
  - A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
- B. ALL ISOLATOR PLUS ROWS
  - B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW PLUS
  - B.2. USING A FLASHLIGHT, INSPECT DOWN THE ISOLATOR ROW PLUS THROUGH OUTLET PIPE
    - i) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY
    - ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE
  - B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

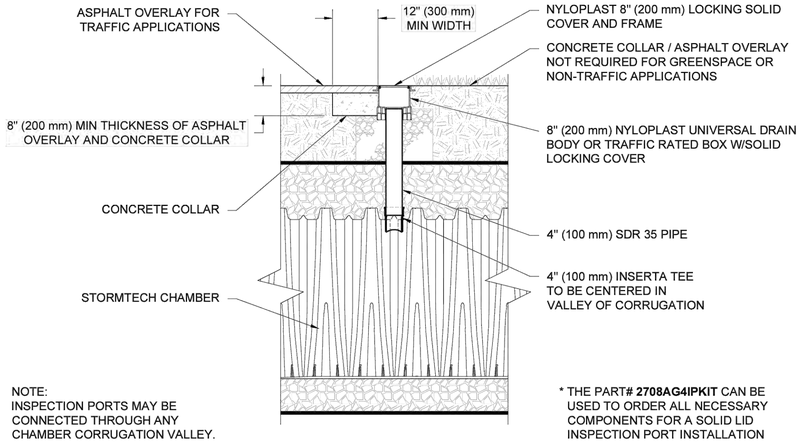
STEP 2) CLEAN OUT ISOLATOR ROW PLUS USING THE JETVAC PROCESS
- A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45" (1.1 m) OR MORE IS PREFERRED
- B. APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
- C. VACUUM STRUCTURE SUMP AS REQUIRED

STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

NOTES

1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.
2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.



NOTE:
INSPECTION PORTS MAY BE CONNECTED THROUGH ANY CHAMBER CORRUGATION VALLEY.

* THE PART# **2708AG4IPKIT** CAN BE USED TO ORDER ALL NECESSARY COMPONENTS FOR A SOLID LID INSPECTION PORT INSTALLATION

RE: Mead Johnson – Traffic Study Summary

Dear Tim,

We thought it would be useful to provide a letter summary of the traffic study VK Civil has provided. The counts used in the traffic study were taken in the fall of 2025. Below is a summary of proposed traffic movements of the full build out of the Mead Johnson site and some information on your existing traffic system.

1. Truck traffic flow. The existing site has all truck traffic in and out off of Fairfiew Avenue. The existing system also does not have room for more than one truck and therefore while one truck is gaining entry to the site any other trucks must wait in Fairview Avenue. The proposed layout of the site improves this greatly. First, we plan to have all inbound truck traffic to enter from Carlton and exit onto Fairview. Additionally, we plan to provide a deep double entry lane for trucks off of Carlton that would allow 6 trucks in the queue without affecting traffic flow on Carlton Avenue.

2. Employee traffic. The existing traffic entrance for all employees is off of Main Avenue. The proposed project changes this employee entrance to Carlton Avenue which will improve traffic flow on Main Avenue. Additionally, as you will see in the traffic study, Mead Johnson's employee shifts are outside of the peak traffic flow hour that was revealed in the traffic count study in the fall of 2025.

3. Carlton Street capacity. As we were moving employee traffic flow to Carlton and truck entry flow to Carlton we reviewed if any improvements that may be needed on Carlton. The study concluded that Carlton Street has capacity for these entrances and no improvements (just as additional lanes, turn lanes, or decel lanes) are needed.

4. Fairview & Main Avenue intersection. The study of existing counts in the fall of 2025 concluded that this intersection is an existing failing grade for traffic flow.

5. Temporary contractor traffic flow during construction. The construction of this large of a project will take a few years to construct and vary in number of contractors needed to

build the project. We provided a construction contractor traffic route map to the site in the traffic study that avoids the existing failing intersection of Fairview and Main Avenue. We provided analysis of an average contractor count and an analysis of the peak contractor count and our analysis showed that none of the intersections changed to a failing grade due to the temporary contractor construction traffic.

Sincerely,

VK Civil

Dan Lewis, PE

Mead Johnson Nutrition
Zeeland Modernization Masterplan
Zeeland, MI
Storm Water Narrative
Revised 04/02/2026

Introduction

This memo summarizes the storm water management plan for the Mead Johnson Nutrition Zeeland Modernization Masterplan. The proposed project involves the construction of two main buildings at the existing Mead Johnson Nutrition facility in Zeeland Michigan, the Specialty building (Buildings 66, 67, 68, 69, 70, 71, & 77) and the ZIPP building addition (Building 73). A significant amount of impervious areas are proposed for the construction of the Specialty building including associated truck docks, employee parking lot, visitor parking lot, loading areas, sidewalks, and pocket park. The ZIPP addition construction will include additional truck docks, loading areas, and access road. A bridge will also be constructed across the Brower Drain to facilitate site logistics to the ZIPP addition building. As a result of this expansion, additional stormwater management infrastructure will be constructed and portions of existing aging storm sewer infrastructure will be replaced including new stormwater piping, outlet control structures, discharge locations to the Brower Drain, and water quality devices. Additionally, two new underground detention systems will replace the two existing stormwater management basins on site. The overall stormwater management design necessary to facilitate this expansion has been designed in accordance with the Ottawa County Water Resources Commission Site Development Rules.

Existing Conditions

The existing site is 45.38 acres of developed industrial and residential land that includes the existing Mead Johnson facility and multiple adjacent properties which have been acquired by Mead Johnson. All of the 45.38 acres currently owned by Mead Johnson has been rezoned and is now part of the I-2 industrial district. The current drainage pattern of the site is split into four existing tributaries, North, West, East, and Central. The Lower Grand River Organization of Watersheds (LGROW) design spreadsheetwas utilized to size the required detention volumes and release rates for the site. The LGROW spreadsheets assumes existing tributary areas are equal to proposed tributary areas for calculations. Therefore, the boundaries of the existing four tributary areas were maintained in the proposed condition with the only difference being the change in impervious ratio. See Attachment 2 for Existing Tributary Drainage Map.

North Tributary

The North tributary collects approximately 5.18 acres of mostly impervious area and discharges to an existing detention basin directly north of the existing ZIPP building. See Attachment 2 for Existing Tributary Drainage Map.

West Tributary

The West Tributary is approximately 18.44acres of existing developed impervious and pervious areas. The West Tributary currently drains the west half of the existing Mead Johnson facility to an existing detention basin directly north of the main employee parking lot. The additional land west of the existing facility now owned by Mead Johnson currently drains to existing onsite wetlands which ultimately discharge to the Brower Drain. This area is included in the existing West Tributary as both areas outlet to the Brower Drain in roughly the same location. In the proposed condition, all of the runoff from this tributary will be detained and released via the West Basin. See Attachment 2 for Existing Tributary Drainage Map.

East Tributary

The East Tributary is approximately 0.95 acres of impervious area along the Northeast corner of the existing ZIPP building. Stormwater from this area currently drains to a series of large 36" diameter storm sewer structures and is restricted by a 6" orifice prior to release to the Brower Drain. See Attachment 2 for Existing Tributary Drainage Map.

Central Tributary

The Central tributary currently drains the central and southeast portions of the existing Mead Johnson facility including the ZSP building and wastewater treatment plant. Stormwater runoff from the Central Tributary ultimately discharges to the Brower Drain via a 42" mainline storm sewer. See Attachment 2 for Existing Tributary Drainage Map.

Proposed Conditions

The proposed condition of the overall site will mimic the existing conditions to the greatest extent possible with the addition of two underground stormwater detentions systems to detain the increase in stormwater runoff. The proposed stormwater runoff from the site will be directed via roof, overland, and gutter flow prior to discharging to a series of catch basins, manholes, and pipes that will convey the stormwater to the proposed underground detention area within the given tributary. A summary of the stormwater conveyance design is included in section title "Stormwater Conveyance". The stormwater detention areas have been sized to detain the 100-yr rainfall event with a maximum allowable release rate of 0.13 cfs per acre using the runoff curve method via LGROW spreadsheet. The detention volumes have also been checked using the rational method and are included in Attachment 10 and 11. Extended detention will be utilized to meet the required channel protection volumes generated for the individual tributaries. Required water quality volumes will be met through the use of catch basin sumps, extended detention, and the ADS Storm Tech Isolator Row volume.

North Tributary:

The North Tributary (5.18 acres) will increase from an existing curve number of 90 to 95 as a result of the increase in impervious area. A 15-minute minimum developed time of concentration has been used for the North Tributary based on the calculated time of concentration being less than 15-minutes. This results in a required flood control volume of 92,585 cft. The required extended detention volume is 5,271 cft at an allowable release rate

of 0.041 cfs. The standard allowable discharge (0.13 cfs/ac) has been used in calculating the overall allowable release rate of 0.67 cfs. An ADS Storm Tech MC7200 chamber system is proposed as the "North Basin" which will detain the required volume at elevation 651.00 The Storm tech system details are provided in the civil drawings for reference. The North Basin will outlet to the Brower Drain via outlet control structure (OCS) 401. A low flow orifice designed to detain the required extended detention volume and release at a rate less than 0.041 cfs has been provided. Additionally, a flood control orifice has been designed so that the total combined release rate from both the low flow orifice and the flood control orifice is less than 0.67 cfs. See Attachment 6 for LGROW Design Spreadsheet – North Tributary.

West Tributary:

The West Tributary (18.44 acres) will increase from an existing curve number of 74 to 93 as a result of the increase in impervious area. This results in a required flood control volume of 308,780 cft. The required extended detention volume is 71,474 cft at an allowable release rate of 0.55 cfs. The standard allowable discharge (0.13 cfs/ac) has been used in calculating the overall allowable release rate of 2.40 cfs. An ADS Storm tech MC3500 chamber system is proposed as the "West Basin" which will detain the required volume at elevation 647.00. The ADS Storm Tech system details are provided in the civil drawings for reference. The West Basin will outlet to the Brower Drain via outlet control structure (OCS) 101. One orifice has been designed to act as both flood control and channel protection. The low flow through the orifice at the extended detention volume elevation is less than the allowable release rate for channel protection. Additionally, at the flood control elevation the same orifice will discharge at less than the allowable release rate. See Attachment 5 for LGROW Design Spreadsheet – West Tributary.

East Tributary: (Redevelopment Area)

The East Tributary (0.95 acres) is currently comprised completely of existing impervious areas including pavement, roof, and industrial equipment. The proposed condition will include portions of the ZIPP addition truck docks, access road, and bridge. To limit the disturbance in the East Tributary to the furthest extent possible, all roof runoff from the ZIPP addition building will be diverted as to remain in the North Tributary. Therefore, the East Tributary area and curve number will remain the same as the existing condition, 0.95 AC & 98 respectively, and the proposed work will be treated as redevelopment by LGROW definition. The East Tributary currently drains to 480 LF of existing 36" diameter storm sewer pipes restricted by a 6" pipe set in the existing 12" outfall to Brower Drain. This 6" pipe is acting as controlled release orifice and is set at elevation 644.50. The proposed condition will remove portions of this 36" diameter pipe and replace with shorter sections of 42" and 24" diameter pipe. The existing detention volume provided by the current 480 LF of 36" storm sewer is 3392 cft. The proposed condition will include 294 LF of 36", 98 LF of 42", and 153 LF of 24" diameter storm sewer resulting in 3502 cft of provided detention volume.

A weir wall with 6" orifice has been designed in OCS-402 to replace the existing 6" grouted pipe orifice. The invert of the proposed orifice will match the existing orifice invert of 644.50. The existing condition does not provide an overflow spillway in the event that the orifice becomes clogged. In this case, the current "overflow" is catch basin grate of CB-3.1 at elevation 650.05. The proposed overflow weir has been designed at elevation 649.00 to prevent this in the future. The maximum top of pipe elevation in the existing system will remain below the overflow elevation so that the full detention volume of the pipes is achieved prior to the overflow.

Central:
No work is planned in the Central Tributary beyond an enabling project that will relocate the existing onsite Nitrogen generation plant. To facilitate the relocation, an existing building and associated concrete sidewalks will be removed and replaced with a new concrete pad where the new nitrogen tank will be placed. The difference in impervious area in this location is negligible and therefore no additional detention has been provided. Two 12" storm sewers will be relocated in the process to maintain the existing overland drainage and conveyance flow pattern.

Weirs and Overflow Spillways
Three weir walls have been designed within outlet control structures OCS-101, OCS-203, and OCS-402. Due to the nature of underground detention system, traditional overflow spillways are not feasible. The primary overflow for OCS-101, OCS-203, and OCS-402 is a concrete weir wall which have been modeled as sharp crested weirs. A developed time of concentration of 15 minutes has been used to determine the peak discharge for all three weirs. The peak discharge for OCS-101 and OCS-203 has been determined based on the 10-yr storm in accordance with the Ottawa County Water Resources Commissioner Site Development Rules. OCS-101 and OCS-203 have been outfitted with a 5' diameter bar grate and placed adjacent to the Brower Drain to serve as the secondary spillway. Rip Rap has been provided around these structures in the overland flow route path. Both paths will drain directly to the Brower Drain in an emergency overflow scenario. See Attachment 7,8, & 9 for weir calculations.

The weir wall within OCS-402 has been designed based on the provided detention volume at the maximum elevation of the proposed system (649.00). The existing release rate was calculated using the existing provided detention volume at the maximum storage elevation of the existing system and the known size of the weir (6"). The proposed orifice will release at a rate just under the existing release rate with the intent being to match existing conditions in the East Tributary to the furthest extent possible. See Attachment 9 and Attachment 12.

Stormwater Conveyance
The majority of the proposed site will be impervious surfaces comprised primarily of roof and pavement areas. Stormwater runoff from pavement areas will be directed to curblines and conveyed via gutter flow to catch basins. Runoff from roof areas will be directed to inlets on the roof that will connect to the interior plumbing design prior to discharging from the building below grade. The site stormwater pipes will connect to the designated roof drains via downspout connectors and pipe the stormwater to the underground detention areas. A few areas onsite offer large green spaces which will be drained via overland flow to multiple yard basins that connect to the underground detention system.

The proposed stormwater conveyance system has been designed to convey the 10-yr, 24-hr storm event based on NOAA Atlas 14 rainfall data for Zeeland, MI. The rational method was used to size the storm sewer piping based on regional tributary areas. A tributary area map has been included in the attachments. See Attachment 4 for Proposed Tributary Drainage Map – North Basin and Attachment 3 for Proposed Tributary Drainage Map – West Basin. The stormwater conveyance calculations have also been provided and are included as Attachment 1.

Michigan Department of Environment, Great Lakes, & Energy (EGLE) & Culvert Design

The proposed project will include two storm sewer outfalls to the Brower Drain that will require permitting through the Michigan Department of Environment, Great Lakes, & Energy (EGLE). Additionally, a bridge is proposed to cross the Brower Drain near the ZIPP addition building. A 90 LF by 12 LF concrete box culvert (6'deep) has been proposed to span the Brower Drain. The greater tributary drainage area feeding the Brower Drain was analyzed and determined to be less than 2 square miles. Additionally, an existing culvert exists immediately upstream and provides less capacity than the proposed concrete box culvert, therefore, a complete culvert design was not completed at this time.
A complete permit set has been furnished and will be submitted to EGLE spring of 2026.

Conclusion

This storm water management plan outlines the stormwater design for the Mead Johnson Nutrition Zeeland Modernization Masterplan which has been designed in accordance with the Ottawa County Water Resources Commission Site Development Rules. The stormwater design includes pipe conveyance, channel protection, flood control, extended detention, EGLE permitting, weir design, and culvert design. Stormwater management for the proposed site will mimic existing conditions by maintaining the overall existing tributary boundaries. Detention for the two impacted tributaries, North and West, will be upgraded through the use of two ADS Storm Tech chamber systems which will replace existing surface detention basins. The two existing outfall locations to the Brower Drain will be replaced and upgraded with outlet control structures including orifices and overflow weirs. A full list of attachments is included on the following pages including maps and calculations used in the complete design of the storm sewer system.

Instructions

1) After opening the spreadsheet you will need to enable the use of an embedded macro. Look for security warning above and click "Enable Content."
2) Data is entered in yellow cells. Green cells allow selection of items from pulldown menus or buttons.
3) To clear all input data entered in a worksheet, click the Clear Worksheet button at the top of the page and hit the delete key.
4) Comments are indicated by red triangles in cells. Further direction is provided in the LGROW Design Spreadsheet Tutorial.
5) The spreadsheet can be used to model a single discharge point from the site including structural BMPs in series or parallel.

Instructions

1) After opening the spreadsheet you will need to enable the use of an embedded macro. Look for security warning above and click "Enable Content."
2) Data is entered in yellow cells. Green cells allow selection of items from pulldown menus or buttons.
3) To clear all input data entered in a worksheet, click the Clear Worksheet button at the top of the page and hit the delete key.
4) Comments are indicated by red triangles in cells. Further direction is provided in the LGROW Design Spreadsheet Tutorial.
5) The spreadsheet can be used to model a single discharge point from the site including structural BMPs in series or parallel.

Site Plan Review Comment Response Memo

The following review comments were received by VK Civil on Thursday 4/30/2026. We have reviewed the comments and summarized our responses to each item in red. Revisions to the plans have been made in accordance with the comments and are included in the revised submittal for staff review.

Re:
Re: Mead Johnson H Company Campus Modernization Project - Initial Staff Comments on Site Plan Review and Special Land Use Application Filed April 6, 2026

Dear Mr. Barron,

Staff has completed an initial review of the April 6, 2026 Planning Commission application for the above-referenced project. The following comments identify items requiring clarification, additional information, or plan revisions to ensure consistency with applicable ordinances and to support continued review. Certain items are advisory in nature or remain under coordination with the applicant's team and reviewing agencies. As the review progresses, some items may be addressed administratively or incorporated as conditions of any approval granted.

Utilities and Engineering

Water

1. Provide fire water service information, including whether the system can be connected to low pressure water lines.
   VK Civil has revised the plans to include a 12" domestic connection to the city's existing watermain in Carlton Street. Therefore, domestic and fire protection services will no longer be served from one single connection to the city system and pressure concerns will be resolved. See sheet C400.

2. Staff continues to coordinate with the City Consulting Engineer to model projected usage; additional follow-up will be provided.
   Noted

Sanitary Sewer (Clean Water Plant)

- Anticipate up to three (3) sanitary discharge points:
  - New specialty processes (requires flow meter and monitoring manhole)
  - Existing treatment facility (requires flow meter and monitoring manhole)
  - Admin building/cafeteria/locker rooms (requires monitoring manhole and oil/grease separator)
- Provide monitoring manholes and pretreatment components at connection points to City Sanitary Sewer per City standards.
  It is our understanding normal sanitary sewer from bathrooms and sinks do not need to be monitored. These "regular" sanitary sewer waste streams have been labeled more clearly on the revised plans. There is 4" process waste line (lab waste) out the south side of the building where a monitoring manhole has been added in Main Street ROW to meet your requirements. Additionally, one monitoring manhole has been added in the northwest area of the site for all other process waste from the proposed and existing WWTP and a proposed easement has been shown on the plans to this monitoring manhole. VK Civil has also revised the monitoring manhole and grease interceptor details to match those provided by the City. See sheets C300, C400, and C601 for revisions.
- Transition front private to public infrastructure at manhole SM7002 and reroute private sewer lateral KEBCO Properties (Parcel lD 70-17-18-400-010) into public infrastructure
  The existing KEBCO properties sanitary sewer lateral will be rerouted so the discharge does not flow through Mead Johnsons private sanitary sewer system. VK Civil has designed the revised routing for this pipe on sheet C400. The intended transition from private to public sanitary sewer will now be at proposed manhole MH-H. A 20.0' sanitary sewer easement is also proposed at this location.

City of Zeeland

- Wastewater modeling is ongoing; no final determination has been made regarding acceptable waste streams or discharge configuration. Further coordination with the City's engineering consultant will be required following completion of modeling.
  Noted.
- See attached materials for additional information.
  Received.

Engineering / Utilities Coordination (City Consulting Engineer)

- Existing and proposed utilities are difficult to follow. Some existing pipes are not labeled.
  VK Civil has added additional labels to the utility plans for existing pipes.
- Identify which pipes are public and which are private.
  VK Civil has added labels to identify public vs. private pipes at critical tie in locations.
- Label existing and proposed easements.
  All existing easements are labeled on survey plans provided by Nederveld. The previously proposed ROW north of Division was labeled by VK on the survey plans provided by Nederveld. Proposed easements with Semco, Consumers Energy, and the City of Zeeland are shown on corresponding layout and utility plans. See sheets C300 through C416.
- Show existing features on utility plans including the Brower Drain, water tank, and booster pump station.
  Existing features including Brower Drain, water tank, and booster station have been labeled on the plans. See sheets C200 and C400.

- The upgrades to the sewage lift station at Carlton Street are still to be determined. As referenced in the April 1, 2026 memorandum (attached), the preferred discharge point is at the intersection of Washington Avenue and Carlton Street, which would require the gravity sewer in Washington Avenue to be upsized to 12 inches from Carlton Street to Church Street.
  VK Civil and Mead Johnson intend to work with the City to finalize this design. Further discussions are required between all parties to come to an agreement that provides the most efficient design and meets logistical constraints.

- As noted in the same memorandum, the capacity of the City's treatment system is still being evaluated to determine what portions of the applicant's wastewater can be accepted.
  VK Civil understands this item is still being reviewed and will work with the City once the data has been finalized and a firm direction has been agreed upon between the City and Mead Johnson.

Stormwater

- There is an existing 15-inch storm sewer in Division Avenue that discharges to the Brower Drain (see attached plan). This will need to be rerouted, with appropriate easements provided. The proposed routing of the City's storm sewer through a private stormwater management system is not supported, as it would limit the City's ability to access and maintain the infrastructure. Revise the plans to ensure the public storm sewer remains accessible, either through a dedicated easement or by rerouting within the Main Avenue and Carlton Street rights-of-way.
  VK Civil has revised the design by placing a series of new manholes along Mead Johnson property adjacent to Main Street and Carlton Street. The existing storm sewer on MJN property will be redirected west at Main Street to Carlton Street and then North to the public utility easement along the north edge of MJN property near the proposed fire pump house. The fire pump house has been rotated 90 degrees and the proposed 16" watermain has been shifted south to accommodate the proposed 18" storm sewer. The proposed storm sewer will then discharge to the existing ditch west of the existing Carlton Lift Station. The existing tributary area to this ditch will shrink to near zero from the existing condition based on the proposed storm sewer infrastructure as part of the overall development. The existing 18" culvert will provide sufficient capacity in the proposed condition to handle the expected peak flow from the existing 15" storm sewer that is being rerouted. A 20' easement will be provided to the City for portions that are on MJN property. See sheet C411.
- Stormwater treatment and detention utilize Stormtech chambers for infiltration and underground detention. Per the plan notes, the system shall be designed to meet AASHTO LRFD Bridge design loads.
  The proposed ADS Stormtech system is designed to meet AASHTO LRFD Bridge Design Loads. See sheet C610.
- The stormwater management plan and calculations must be submitted to and approved by the Ottawa County Water Resources Commissioner's Office. Any site plan approval shall be conditioned upon obtaining all required approvals from that office.
  VK Civil intends on submitting to the Ottawa County Water Resources Commissioner's office during the week of May 4th, 2026.

Additional Engineering Review Items

- Check inverts at CB-1, as the north invert is currently shown higher than the south invert.
  VK Civil has revised the north invert of CB-1. See sheet C415.
- The submitted traffic study has been reviewed by the City's consulting traffic engineer-. Ongoing coordination with the applicant's engineer is occurring to address additional information and clarification needs.
  Noted.
- Clarify intended truck access routes, as prior discussions and submitted materials indicate differing assumptions regarding use of Carlton Street and Washington Avenue.
  Both the Carlton and Fairview truck entrances will be used for inbound and outbound truck traffic. The Carlton entrance will be used primarily to serve the new Specialty building and the Fairview entrance will be used primarily to serve the existing facilities. Mead Johnson will continue to evaluate this model as site operation changes over time in order to best serve the needs of both the Company and the City.
- With increased truck traffic on Carlton Street and Washington Avenue, pavement deterioration is expected to accelerate. Consideration should be given to increasing pavement thickness (e.g., to approximately 6 inches with higher stress mixes) to better support loading and reduce long-term maintenance.
  Mead Johnson will work with the City to determine the most feasible option for pavement repairs following the final determination of the Washington Avenue sanitary sewer upgrades. Further discussions are required between all parties before a determination can be made regarding this comment.

Public Safety (Fire)

- Provide apparatus access to all areas of the site, free of obstruction, and ensure adequate turning radius for emergency vehicles.
  VK Civil has added sheet C316 to the plan set depicting fire truck access to all areas of the site where new work is proposed.
- Provide Knox box access and ensure site accessibility at all times, particularly if the site is not continuously staffed.
- VK Civil has added notes to sheet C300 that require Knox Box access at all new entrances, gates, FACP access, and any other entrances desired by the ZFD officials.
- Fire Department Connections (FDCs) shall be designed as part of a looped system rather than a single riser connection.
  Two remote FDC’s have been implemented to meet the spacing requirements. These connections connect directly to the fire loop rather than a single riser connection to the building.
- Hydrants shall meet spacing and location requirements, including maximum distances from buildings and proximity to FDC connections.
  VK Civil has added two remote FDC’s to meet the FDC distance requirement. All public hydrants along Main Street, Carlton Street, and Fairview Avenue meet the 500’ spacing requirement.
- Access drives shall meet minimum width requirements, particularly in areas adjacent to hydrants.
  Access drives currently meet or exceed the minimum width requirements. Additional dimensions have been added to sheet C300 for clarity.

- Where building height exceeds 30 feet, provide at least one side of the building with a minimum of 15 feet of unobstructed clearance to accommodate aerial apparatus.
  VK Civil has added sheet C316 to the plan set depicting fire truck access to all areas of the site where new work is proposed.

- Design shall comply with IFC Chapter 5 and Appendix D. Site Design and Operations
  VK Civil has reviewed the above referenced specification and confirmed the current design meets the requirements. Additionally, post indicator valves have been added to each location where a proposed fire service enters the building.

Parking and Site Operations

- Existing on-site areas are proposed for contractor and overflow parking during construction. Clarify whether these areas are intended for temporary use only or as part of the long-term site plan.
  The existing on-site areas proposed for construction contractor and overflow parking (Rieth-Riley property) are currently intended to be utilized only during construction of the proposed development.
- If contractor or overflow parking areas are intended to remain as a permanent component of the site, they shall be clearly identified and may require inclusion as part of any requested parking or landscaping waivers.
  See previous response.
- Provide additional detail regarding any improvements proposed to support contractor or overflow parking.
  Improvements to the Reith-Riley property, to be used for construction parking and potential laydown area will be limited to clean up and patching to provide a suitable surface for parking and storage.
- To the extent that deferred parking areas are constructed, improved, or actively utilized, such areas shall comply with applicable ordinance requirements, including landscaping, greenbelt, and sidewalk provisions.
  See previous response number 1 under “Parking and Site Operations” above.

Southwest Corner Greenspace

- Provide additional detail regarding the proposed greenspace at the southwest corner of the site, including fencing, pavement treatments, landscaping, pedestrian circulation, and any proposed amenities.
  The Pocket Park at the corner of Main Avenue and Carlton Street is in a concept phase. Final design of this is in progress and design approval by the city can be included in the overarching development agreement.
- The timing of construction and maintenance responsibilities for this area shall be addressed as part of a development agreement.
  Mead Johnson is planning to cover the cost of design and construction of the proposed pocket park as part of the proposed development. Following the completion, it is Mead Johnson’s desire to deed the park to the City of Zeeland.

Development Agreement

- A development agreement will be required to address site-related improvements, including utilities and other elements identified during the review process.
  Understood. An overarching development agreement, which is currently in development, will address these issues.
- While the relocation of the playground equipment from Bethel CRC to ZPS is not a part of this site plan review process, it is likely that the Planning Commission v ill have one of the conditions as appropriate playground equipment from the former Bethel CRC property does get relocated to Zeeland Public Schools property as part of the overall site plan approval on the premise.
  Understood. An overarching development agreement, which is currently in development, will address these issues.

Zoning and Land Use Variances Required

The following elements of the proposal do not meet ordinance requirements and will require approval from the Zoning Board of Appeals:

- Building height exceeding the maximum permitted height
- Eight-foot (8') fencing within the required front yard
- Loading area located within the front yard
  Mead Johnson intends to apply for a variance for each of the above referenced non-conformities.

Any approval of the site plan shall be conditioned upon the applicant obtaining all required variances.

Landscaping and Waivers

- The proposed landscaping design deviates from certain requirements of the City's landscaping ordinance. A waiver from the Planning Commission is required for relocating parking lot trees to the Main Avenue greenbelt and for paving in landscaped islands. While the applicant has cited food safety regulations, these adjustments still require formal waiver consideration.
- On Carlton Street, the ordinance requires one canopy tree per 40 feet, resulting in a requirement of approximately 18 trees. The plan shows 16 canopy trees and 3 evergreen trees. If the Planning Commission accepts the substitution of evergreen trees in place of the remaining canopy trees, a waiver may not be required; otherwise, a waiver will be necessary.
- On Washington Avenue, no formal greenbelt currently exists, and the long-term approach to this frontage and adjacent parking areas has not yet been defined. Following additional clarification, staff will be able to determine whether additional improvements or waivers are required.
- Ultimately, the Planning Commission will review the final landscaping plan as submitted, including any requested waivers.
  Mead Johnson intends to apply for a waiver from the Planning Commission for each of the above reference non-conformities.

Site Plan Review Comments (Sheet-Specific)

Sheet C300

- Remove unnecessary drive openings along Main Street and restore these areas with curb and gutter
  VK Civil has revised the plans to remove existing curb cuts that will no longer be utilized. High back curb and gutter will be replaced in areas that previously had flush V-style gutter at curb cuts. See sheet C200 for additional demolition items. See sheet C300 for proposed changes.
- Provide dimensioning to demonstrate compliance with the required 20-foot parking setback.
  VK Civil has added additional dimensions to sheet C300 indicating the 20' parking setback is met.
- Revise labeling along Carlton Street where two trees are currently identified as "A - Chain Link Fence."
  VK Civil has revised the plans to correct this issue. See sheet C300.
- Adjust the transition point from aluminum fence to chain link fence along Carlton so that it occurs at the back corner where the fence continues south.
  VK Civil has revised the plans to accommodate the above request. See sheet C300.
- Ensure ADA detectable warning plates meet City standards.
  VK Civil has added notes to the plans indicating ADA detectable warning plates must meet the requirements set forth by the City of Zeeland. Please indicate if the City has a preferred model in the next round of revisions and VK Civil will incorporate into the plan set.

Sheet C301

- Clarify fencing details in the area where Details A and B are both referenced; it appears Detail A is intended.
  VK Civil has revised the plans to correct this discrepancy. Keynote A is intended for proposed fencing in all areas on sheet C301.

Sheet C400

- Identify legend items labeled O, P, and Q.
  Legend items O,P, and Q refer to watermain bends. VK Civil has added bend symbols to the plans for clarity.
- Identify the red hash line shown in the plan and include it in the legend.
  VK Civil has revised the plans by adding the red dashed line to the legend. This line represents the proposed fire protection watermain.

Sheet C401

- Identify the red hash line shown in the plan and include it in the legend.
  VK Civil has revised the plans by adding the red dashed line to the legend. This line represents the proposed fire protection watermain.

- Identify legend items labeled I, J, K, and L.
  Legend items I,J,K and L refer to watermain bends. VK Civil has added bend symbols to the plans for clarity.

Sheet C411

- Identify legend items labeled I, J, K, and L.
  Legend items I,J,K and L refer to watermain bends. VK Civil has added bend symbols to the plans for clarity.

Sheet C601

- Provide detailed specifications for the proposed ornamental aluminum fence.
  VK Civil has provided the manufacture and model number of the 8' aluminum fence on sheet C601. Detailed specifications have been requested from the manufacturer and will be provided to the City once received.

Additional Items

- Please confirm whether a transformer is proposed on-site and, if so, ensure it will be screened in accordance with ordinance standards.
  The main electrical service for the proposed site is in the final design stages. Mead Johnson engineering has provided preliminary requirements, and is currently working with the Zeeland BPW to define the strategy for Electric service to the site. If an onsite transformer is needed for the site it will be screened from view of the street once a location is determined.
- The photometric plan for exterior lighting is currently under review; additional comments may be provided following completion of that review.
  Noted.

Staff appreciates the completeness of the plan set for a project of this scale. The continents provided herein reflect staffs initial review of the submitted materials. Given the size and complexity of the project, as well as ongoing coordination related to utilities, traffic, and other site design elements, additional or revised comments may be provided as the review progresses.

Please contact me directly if you would like to schedule a site development team meeting to discuss the project and these comments in further detail. You may also reach out to your existing staff contacts regarding specific review items.

For clarity and efficiency, please provide a consolidated response addressing all comments and plan revisions no later than the end of the day on Monday, May 4. Upon receipt of updated materials, staff will complete its review and provide a final report its advance of the May 11 Planning Commission public hearing.

Please feel free to contact me with any questions. Thank you for your continued coordination with staff on this significant project.

Sincerely,

Timothy Maday

Community Development Director City of Zeeland, MI

If you have any questions, concerns, or require additional information, please do not hesitate to contact our office.

EXECUTIVE SUMMARY: Community Benefit & Mitigation Proposal

RE: Mead Johnson Nutrition – Zeeland Modernization Masterplan (725 E. Main Ave) Submitted by: Ryan Baas, 28 Sanford St. | May 11, 2026

Overview

As a direct neighbor to the proposed expansion, I support Mead Johnson's continued investment in the Zeeland economy. However, the requested height variances (234' towers) and the relocation of industrial operations closer to the Main Avenue residential corridor impose a permanent "cost" on local families. This proposal outlines three specific conditions for site plan approval intended to mitigate these impacts and foster a long-term strategic partnership between the company and its neighbors.

The Three Primary Conditions for Approval

1. Footprint Optimization (The North-Shift)

- **The Request:** Re-evaluate the site layout to shift the high-density construction and the 234-foot tower further North toward the Washington Avenue industrial zone.
- **The Goal:** To preserve the residential skyline along Main Avenue and reduce the immediate noise and vibration impact on Sanford, Division, and Park Street residents.

2. The Veldhof Legacy Playground

- **The Request:** Mead Johnson to fund and construct a modern, "destination-grade" playground to replace the loss of the Bethel Church Veldhof Playground.
- **Key Features:**
    - Inclusive, ADA-accessible surfacing (no woodchips).
    - Modern climbing structures, sensory play areas, and a community splash pad.

Received: 05/07/26
City of Zeeland, MI

3. Neighborhood-to-Career Scholarship Fund

- **The Request:** Establishment of a sustainable scholarship program for neighborhood youth, focusing on both traditional and non-traditional career paths.
- **The "Talent Pipeline":** This initiative includes annual HR mentorship and a direct interview process for recipients, turning neighborhood children into Mead Johnson's future skilled workforce.

Why These Conditions?

- **Fair Mitigation:** The 234-foot tower height is a massive deviation from standard city code. These benefits serve as a fair trade for the permanent alteration of the neighborhood's character.
- **Strategic Partnership:** By investing in a scholarship pipeline, Mead Johnson secures a reliable, local labor force while providing stability for neighborhood families.
- **Community Continuity:** Replacing the lost playground ensures that this Zeeland neighborhood remains a premier location for young families to stay and grow.

"Let's ensure this project creates a lasting legacy for the families who will live in the shadow of these towers for the next fifty years."

June 12th, 2025

To: Art Pike – Mead Johnson/Reckitt

Subject: Enhancing Community Partnership: A Sustainable Scholarship Fund for Local Youth

Dear Mr. Pike,

On behalf of the residents of the neighborhood affected by Mead Johnson's expansion, I am writing to you today with a proposal to deepen Reckitt's already valued presence in our community. As you expand your operations in Zeeland, we recognize the significant impact this growth will have, and we are eager to explore opportunities for mutually beneficial partnerships.

Following up on our discussions regarding a scholarship fund for students from families in the affected neighborhood, I've developed an idea that I believe could transform this initiative into a truly sustainable and strategic investment for Reckitt.

Our proposal is for a **higher education scholarship program** that not only provides essential financial support but also creates a direct talent pipeline for your company. Here's how it would work:

- **Application Interview:** When students apply for the scholarship during their senior year of high school, they would engage in an interview with Mead Johnson's Human Resources department. This provides an early opportunity for both the students and Reckitt to connect and assess potential alignment.
- **Annual HR Engagement:** To maintain their scholarship in subsequent years, recipients would have an annual contact or meeting with an HR representative. This ongoing engagement allows Mead Johnson to monitor their academic progress, offer mentorship, and provide career guidance relevant to your industry.
- **Strategic Workforce Development:** By consistently engaging with these students throughout their schooling, Mead Johnson's HR team would gain valuable insight into their skills, interests, and development. This sustained relationship could culminate in a tailored job offer for each student upon their graduation, ensuring a ready pool of qualified and familiar local talent.

Received: 05/07/26
City of Zeeland, MI

I believe this model offers a significant **"win-win"** for both our community and Reckitt. For the students, it provides not just financial assistance but also invaluable mentorship, career direction, and a clear path to employment. For Mead Johnson, it represents a proactive and cost-effective strategy for **recruiting and retaining skilled local employees**, fostering strong community ties, and enhancing your reputation as a committed corporate citizen. This integrated approach turns philanthropy into a strategic investment in your future workforce.

I am confident that by linking the scholarship fund to such a robust talent development initiative, Mead Johnson would see a significant return on its investment, justifying a more substantial contribution to the fund.

I would be grateful for the opportunity to discuss this proposal further with you at your convenience. Thank you for considering this innovative approach to community partnership.

Sincerely,

Ryan Baas

VELDHOF LEGACY PARK PROPOSAL

Community Benefit & Mitigation | Zeeland City Planning Commission | May 11, 2026

Vision Statement

To replace the loss of the Veldhof Playground with a world-class, multi-generational discovery park. This destination-grade asset serves as a fair-trade mitigation for the permanent visual and industrial impact of the 234-foot tower expansion on the surrounding residential neighborhood.

Key Playground Zones

1. The "Sky-High" Discovery Tower

- 20-foot vertical climbing mesh tower.
- Landmark architecture echoing local modernization.
- Integrated transparent spiral tube-slides.

2. Kinetic Hydro-Lab (Splash Pad)

- Zero-depth entry for 100% accessibility.
- Interactive dams, waterwheels, and "Formula" pumps.
- Recirculating, filtered water system for sustainability.

3. All-Abilities Sensory Sanctuary

- Acoustic "cocoons" for sensory regulation.
- Tactile exploration walls and musical lithophones.
- Inclusive "We-Go-Round" and adaptive swings.

4. High-Rebound Terrain

- Seamless, pour-in-place rubber topography.
- Integrated in-ground trampoline mats.
- Safe "parkour" mounds for physical development.

Modern Amenities & Safety

- **Digital Integration:** Augmented Reality (AR) markers for gamified physical play.
- **Year-Round Use:** Heated pathways for snow-melt and solar-powered charging benches.
- **Natural Buffer:** Nature playscape transition with reclaimed wood and butterfly waystations.
- **Location:** Open field East of the Zeeland Bus Garage—centralized for residential access.
